Miscellanea

A Supplement to Warren's Monograph of the Genus Erebia

E. W. Classey has informed us that, due to lack of support, his firm is no longer able to reprint the late B. C. S. Warren's Monograph of the Genus *Erebia*. However, a supplement to this work, written by Warren himself, should be published by July of this year.

The supplement will consist of 20 pages containing two half-tone plates and another half-tone illustration in the text. It will include a new review of the *tyndarus* group and throw fresh light on the riddle of *Erebia serotina*.

The prince, including postage and packing, will be £ 5.00 or US $ 12.00 (DM 27. –). Orders can be accepted now at P.O. Box 93, Faringdon, Oxon, SN7 7DR, England.

D'Abrera's Butterflies of the Neo-Tropical Region

The members of SEL will be interested to have some news of the long-awaited D'Abrera volume Butterflies of the Neo-Tropical Region.

Part 1 – *Papilionidae and Pieridae* – has just been published. The format is the same as for the former volumes on the Australian and Afro-Tropical Faunas. Fully illustrated in colour. A colour brochure is available and the book may be obtained direct from E. W. Classey Ltd., P.O. Box 93, Faringdon, Oxon.

Part 2 – *Danaidae, Heliconiidae, Ithomiidae, Satyridae* – will be ready in the early part of next year (1982).

The preparation of this volume has been extremely expensive and it covers an area of which the fauna is much more poorly known than that in either of the previous volumes. When completed (in 5 parts), it will span the whole of the Neo-Tropical Butterflies other than the *Hesperiidae*.

Specifications of Volume 3 (= Part 1, *Papilionidae* and *Pieridae*) : 208 pages, size $13^1/_2 \times 10$ inches. Price £ 85.00 (US $ 185. –). Orders can be accepted now for delivery at this price. Subscribers will be invoiced when the book is sent.
