CD-Hinweis (Insecta tropica)

Lucanidae of Thailand
This CD ROM presents the 115 Lucanidae beetles reported from Thailand (some are new reports), pictures and distribution maps of each species are provided and even in many species different pictures permit a better opinion about the morphological variation of the species. (English version).

Butterflies of Nicaragua
Spanish version, with many pictures of all the species.

Insects associated with humid-tropics crops of Nicaragua
(Spanish version) with many pictures and a checklist of all the insects reported from Nicaragua and associated with crops like: cocoa, coconuts, mahogany, cassava, maracuya (*Passiflora edulis*), black pepper, vanilla, and many more).
Each CD ROM for 20 US $ + 5 US $ of sending costs.
