Sebő Endrődi

Sebő Endrődi (18 October 1903 – 18 December 1984) was a Hungarian lawyer and entomologist who specialized in the subfamily *Dynastinae* of the Scarab beetles. He was the author of a landmark monograph on the *Dynastinae of the World* which was published shortly after his death.

Endrődi was born in *Kassa, Hungary* and went to study law, receiving a doctorate in 1931. He took an interest in beetles at an early age, growing up in the *Börzsöny Mountains*. He retired from law in 1966 and became an associate at the Hungarian Museum of Natural History. His first publication on beetles was on the genus *Oryctes* and was based on the *Rassenkreis* theory. He also published in the *Magyarország Allatvilága* ("Fauna Hungariae") on the *Cerambycid* beetles. He was made an honorary Doctor of Biological Sciences in 1957. He died before his landmark monograph on the *Dynastinae* could be published. He is buried at *Verocemaros, Hungary*. His son *Sebo Endrody-Younga* also became an entomologist who worked in South Africa.^{[1][2]}
