**New locality record
for *Danaus (Anosia) chrysippus* (LINNAEUS, 1758) in Turkey**
(Lepidoptera, Nymphalidae, Danainae)

by
STANISLAV P. ABADJIEV
received 23.IX.1999

Danaus (Anosia) chrysippus is a seasonal migrant 2nd order (EITSCHBERGER, REINHARDT & STEINIGER, 1991). Its locality records in Turkey were summarised by HESSELBARTH, VAN OORSCHOT & WAGENER (1995: 769). In 1996 as a result of activities of the first Bulgarian entomological expedition to Turkey a single male was collected. The specimen was seen in the morning of 27th June along the Göksu River near the road to Silifke (about 14 km S from Mut, Province of İçel). The locality falls in the square with WF44 UTM grid reference. This is a new record for the WF square. The above mentioned specimen is preserved in the collection of the National Museum of Natural History – Sofia.
