Cultural Heritage on Postage Stamps

Fathi Наваsнı, Dep. of Mining, Metallurgical and Materials Engineering, Laval University, Québec, Fathi. Habashi@arul.ulaval.ca

Postage stamps are important means of communication and many countries have recorded important events, honored worthy individuals, and described interesting facts through this medium. Many historical facts, sometimes obscure, can be found on stamps; some of these may not be easily located in a history or a science book. Stamps have artistic value, they are created by artists. Stamps are also a means for propagating culture: music, painting, sculpture, nature, etc. Stamps depicting reproductions of paintings related to mining and metallurgy are also available. They are used every day and can be found everywhere. The role of stamps in cultural heritage of mining and metallurgy will be given. Examples:

Gold in ancient Egypt

Gold mask from Inca civilization

Copper in ancient Cyprus

Iron Pillar of Delhi ca. 400 AD

The world's first metal bridge, 1779

Austrian L-D steelmaking process, 1950s
