

Ber.Kr.Nürnbg.Ent. **galathea 10/2** Nürnberg 1994 S.56

**CORRIGENDUM to  
New records of PSEUDOLUCIA Nabokov, 1945 from Chile  
(Lepidoptera, Lycaenidae)**

Zsolt Balint und Udo Luy

A short contribution on a South American and Austral polyommataine lycaenid genus was published Galathea 10 (1): 23-28 (1994). As the colour plates of the article showed some very recently described taxa for the first time in colour we found to be important to correct some errors, which were discovered when the above mentioned paper came out.

**Material examined:**

The material collected in Reg. Nuble and listed under *Pseudolucia vera* represents an other look-alike taxon, these specimens belong to *Pseudolucia lynnensis*.

**Colour plate 1:**

The sexes of *Pseudolucia chilensis* were reversed.

**Colour plate 2:**

The correct sequence of the taxa on the plate is the following: *P.hazeorum*, *P.annamaria*, *P.andina*, *P.plumbea*.
