

New Data to the Lycaenidae Fauna of Mongolia
(Lycaenidae of Mongolia VII.)
(Lepidoptera, Rhopalocera)

Zsolt Bálint

Zusammenfassung: Es werden neue Verbreitungsangaben zur Lycaenidenfauna der Mongolei mitgeteilt, die aus dem Sammlungsmaterial einiger neuerer Expeditionen stammen.

Abstract: New data to the Lycaenidae fauna of Mongolia are given from the collected materials of some newer expeditions.

Kivonat: Új adatok Mongólia boglárkalepke-faunájához az újabb expedíciók gyűjtött anyagaiból.

1. Introduction

Mongolia was intensively visited by Hungarian lepidopterists in the 80'ies. During the elaboration of the collected material a lot of new taxa were described and a comprehensive brief survey of the *Noctuidae* fauna was also presented (VARGA et al., 1989)

The collected *Rhopalocera* materials were elaborated by Márton Hreblay and Zsolt Bálint (HREBLAY 1990). This work is a supplementary paper of the mentioned one of Hreblay, dealing only with lycaenids collected by the last Hungarian expeditions in Mongolia.

2. Materials

2.1 Not elaborated material of the previous expeditions from the collection of HNHM (Hungarian Natural History Museum, Budapest).

Polyommatus erotides (STAUDINGER, 1892)

1 male: Bulgan aimak, 64 km W of Erdenecant, 104°05'E 47°05'N
1260 m, 7.Viii. 1988, leg Szabóky Cs.

Polyommatus aloisi BALINT, 1988

2 males and 1 female: Chovd aimak, 70 km W from Bulgan sum (at the Chinese border), 1.VIII.1986, leg Z. Varga.

2.2 Material collected by Csaba Juhász, Budapest in the summer of 1989.

Strymonidia eximius (FIXSEN, 1887)

2 females: Central aimak, 10 km N of Ulanbaatar (Urga), Tolgoit, 13. VII. 1989

Lycaena (Thersamonolycaena) splendens violacea (STAUDINGER, 1892)

1 male: Central aimak, 40 km NE of Ulanbaatar (Urga), Terelj, 21. VII. 1989

Everes (Cupido) minimus magnus (STAUDINGER, 1892)

1 female: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989.

Glaucoopsyche (Maculinea) teleius obscuratus (STAUDINGER, 1892)

2 males: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989

Glaucoopsyche (Maculinea) cyanecula (EVERSMANN, 1848)

1 male: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989;

1 male: Central aimak, 10 km N of Ulanbaatar (Urga), Tolgoit, 13. VII. 1989.

Polyommatus (Agriades) aquilo wosnesenskyi (MENETRIES, 1857)

5 males: Central aimak, 10 km N of Ulanbaatar (Urga), Tshingeltei 10. and 22. VII. 1989.

Polyommatus (albulina) orbitulus sajanus (HEYNE, 1895)

4 males: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989;

1 male: Central aimak, 10 km N of Ulanbaatar (Urga), Tolgoit, 13. VII. 1989.

Polyommatus (Albulina) luciferus (STAUDINGER, 1892)

1 male: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989;

1 male: Central aimak, 40 km NE of Ulanbaatar (Urga), Terelj, 21. VII. 1989.

Plebejus (Lycaeides) subsolanus kenteanus (STAUDINGER, 1892)

7 males: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989;

3 males, 10 km N of Ulanbaatar (Urga), Tolgoit, 13. VII. 1989;

2 males: Central aimak, 40 km NE of Ulanbaatar (Urga), Terelj, 21. VII. 1989

Plebejus (Lycaeides) argyrognomon mongolicus (GROU-GRSHIMAILO, 1891)

1 male and 1 female: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-21. VII. 1989;

1 male: Mongolia, 10 km N of Ulanbaatar (Urga), Tolgoit, 13. VII. 1989.

polyommatus (Vacciniina) optilete sibiricus (STAUDINGER, 1892)
1 male: Central aimak, 10 km N of Ulanbaatar (Urga), Tolgoit, 13.
VII.1989.

Polyommatus amandus lydia (KRULIKOVSKY, 1892)
3 males and 1 female: Central aimak, Ulanbaatar (Urga), Sajsan,
Bagatenger, 6-21.VII.1989;
2 males: Central aimak, 10 km N of Ulanbaatar (Urga), Tshingeltei
10. and 22.VII.1989;
6 males: Central aimak, 10 km N of Ulanbaatar (Urga), Tolgoit,
13.VII.1989;
1 male: Central aimak, 40 km NE of Ulanbaatar (Urga), Terelj, 21.
VII.1989.

Polyommatus semiargus altaicus (TUTT, 1909)
2 males: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger,
6-21.VII.1989.

Aricia inhonora strandi (OBRAZTSOV, 1935)
2 males: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger,
6-21.VII.1989.

Aricia chinensis sibiricana (KOZHANTSHIKOV, 1923)
1 male: Central aimak, Ulanbaatar (Urga), Sajsan, Bagatenger, 6-
21.VII.1989.

2.3 Material collected by György Fábrián, Márton Hreblay, László Peregovits and Gábor Ronkay in the spring of 1990.

Everes (Tongeia) fischeri (Eversmann, 1843)
67 males and 17 females: Central aimak, Tsagaan Davaa, 1400-1600m
20 km NW of Bayan Tsadmani, 106°05'E 48°17'N, 25-28.V.1990;

Everes agriades hellotia (MENETRIES, 1857)
1 male and 1 female: Central aimak, Tsagaan Davaa, 1400-1600 m,
20 km NW of Bayan Tsadmani, 106°05'E 48°17'N, 25-28.V.1990;
2 males: Bulgan aimak, 64 km W of Erdenecant, 1260 m, 104°05'E,
47°05'N, 23-24.V.1990.

Cupido minimus magnus (HEYNE, 1895)
5 males and 4 females: Central aimak, Tsagaan Davaa, 1400-1600 m,
20 km NW of Bayan Tsadmani, 106°05'E 48°17'N, 25-28.V.1990.

Scolitantides orion (PALLAS, 1771)
11 males and 4 females: Central aimak, Tsagaan Davaa, 1400-1600 m
20 km NW of Bayan Tsadmani, 106°05'E 48°17'N, 25-28.V.1990.

2.4 Material collected by Márton Hreblay, László Peregovits and Gábor Ronkay in the summer of 1990.

Everes (Tongeia) fischeri (EVERSMANN, 1843)
1 male: Chentij aimak, 45 km SE of Öndörchaan, 13-17.VIII.1990

Scolitantides orion (PALLAS, 1771)

1 female; Chentij aimak, 45 km SE of Öndörchaan, 13-17.VIII.1990

Plebejus argyrognomon mongolicus (RÜHL & HEYNE, 1895)

1 male: Chentij aimak, 45 km SE of Öndörchaan, 13-17.VIII.1990

Polyommatus (Albulina) luciferus (STAUDINGER, 1892)

1 male: Central aimak, Ulanbaatar (Urga), Bogd Uul, Zajsan, 19.VIII.1990.

Polyommatus erotides (STAUDINGER, 1892)

2 males: Chentij aimak, 45 km SE of Öndörchaan, 13-17.VIII.1990

Aricia inhonora strandi (OBRAZTSOV, 1935)

1 male: Central aimak, Ulanbaatar (Urga), Bogd Uul, Zajsan, 19.VIII.1990.
