Notes on Pentatomidae of the Seychelles (*Hemiptera, Heteroptera*)

M. MADL

A b s t r a c t : New records of five species are dealt with.

K e y w o r d s : Pentatomidae, new records, Seychelles.

Introduction

Recently the Pentatomidae of the Seychelles have been reviewed by GERLACH et al. (2006). Mislabelling errors done by the author are corrected. New records of five species and biological notes of *Nezara heegeri* FIEBER 1861, and *Bathycoelis fleuria* ROCHE 1977, are dealt with. *Bathycoelia fleuria* ROCHE 1977, is new to the fauna of Aride Island. All papers concerning Pentatomidae of the Republic of Seychelles are listed, because in Gerlach et al. 2006 the references are not cited fully.

Material examined
