## Liste neuerdings beschriebener und gezogener Parasiten und ihre Wirte. VII.

(Fortsetzung).

|                            |                           |                            |                            |
|----------------------------|---------------------------|----------------------------|----------------------------|
| Panargyrops claviger       | Trichiosoma tibiale       | Pimpla conquisitor         | Tmetocera ocellana         |
| Paniscus geminatus         | Cirphis unipuncta         | — ellopiae                 | Therina somnaria           |
| Parabatus cristatus        | Dieranura furecula        | — ontario                  | — —                        |
| — —                        | Eupithecia sp.            | — scriptifrons             | — —                        |
| — —                        | Hadena pisi               | — hawaiiensis              | Pectinophora gossypiella   |
| — —                        | Halias prasinana          | — inquisitor               | Hylotoma pectoralis        |
| — —                        | Sarothrips revayana       | — inquisitoriella          | Hemerocampa leucostigma    |
| — —                        | Triphaena pronuba         | — —                        | Hylotoma pectoralis        |
| Paraleptomastix abnormis   | Pseudococcus citri        | — instigator               | Trichiosoma tibiale        |
| Paramagrus optabilis       | Perkinsiella saccharicida | — marginatus               | Hemerocampa leucostigma    |
| Paratrichogastra stella    | Agromyza pusilla          | — padellae                 | Yponomeuta padella         |
| Parisierola emigrata       | Pectinophora gossypiella  | — pedalis                  | Cirphis unipuncta          |
| Pelecinus polyturator      | Lachnosterna spp.         | — —                        | Halisidota caryae          |
| Pentachnemus bucculatricis | Argyresthia thuiella      | — —                        | — maculata                 |
| Pentarthron minutum        | Tmetocera ocellana        | — —                        | Malacosoma distria         |
| — —                        | Tortrix fumiferana        | — —                        | Cydia pomonella            |
| Perilampus hyalinus        | Campoplex fugitivus       | — pterelas                 | Gelechia gallaeasteriella  |
| Perilitus eleodis          | Eleodes tricostata        | — —                        | — gossypiella              |
| Pezomachus cursitans       | Lophyrus pini             | — roborator                | Pogonochaerus fasciculatus |
| — instabilis               | Coleophora fuscedinella   | — sagax                    | Hemerocampa leucostigma    |
| Phadroctonus argyresthiae  | Argyresthia sp.           | Pleurotropis ashmeadi      | Plagioderia versicolora    |
| Phaenopria haematobiae     | Haematobia serrata        | — tarsalis                 | Agromyza phaseoli          |
| Phanerotoma erythrocephala | Laspeyresia toruta        | Polycystomyia benefica     | Mayetiola destructor       |
| — franklini                | Mineola vaccinii          | Polygnotus hiemalis        | Cecidomyia resinicola      |
| Philopsyche abdominalis    | Chaliodes junodi          | — pinicola                 | — farinosa                 |
| — albopalteata             | Psyche sp.                | — rubi                     | — symmetrica               |
| Phloeogenes discus         | Plutella maculipennis     | — tumidus                  | Mayetiola destructor       |
| Phygadeuon planosae        | Planosa laricis           | — vernalis                 | Cecidomyia serrulata       |
| Physcus variicornis        | Chionaspis pinifoliae     | Polymecus alnicola         | Lasioptera sp.             |
| Pimpla alternans           | Pieris brassicae          | — lasiopterae              | — —                        |
| — capulifera               | Limenitis populi          | — bifasciatipenne          | Oecanthus sp.              |
| — conquisitor              | Hemerocampa leucostigma   | — var. varium              | Anthonomus signatus        |
| — —                        | Malacosoma distria        | Polynema consobrinus       | Ceresa bubalus             |
|                            |                           | — striaticorne             | Steatoda borealis          |
|                            |                           | Polysphincta texana        | Aphelochirus montandoni    |
|                            |                           | Prestwichia aquatica       | Mantis prasina             |
|                            |                           | Priomerus insidiosus       | Purpuricenus koehleri      |
|                            |                           | Pristaulacus bimaculatus   | Xiphidria longicollis      |
|                            |                           | — patrati                  | Clytus pilosus             |
|                            |                           | — pilosus                  | Strangalia luteicornis     |
|                            |                           | — strangaliae              | Quedius sp.                |
|                            |                           | Proctotrupes reicherti     | Erium sp.                  |
|                            |                           | Pseudococcobius clauseni   | Pseudococcus solani        |
|                            |                           | — fumipennis               | Smerinthus ocellata        |
|                            |                           | Pseudogonalos hahnii       | Aspidiotus rapae           |
|                            |                           | Pseudopteroptrix imitatrix | Chlamys plicata            |
|                            |                           | Psilocera rufipes          | Apatura iris               |
|                            |                           | Psilomastax pictus         | Gelechia gallaesolidaginis |
|                            |                           | Psilophrys pallipes        | Anosia plexippus           |
|                            |                           | Pteromalus archippi        | Aleiodes intermedius       |
|                            |                           | — boucheanus               | Apanteles clisiocampae     |
|                            |                           | — —                        | Campoplex fugitivus        |
|                            |                           | — —                        | — validus                  |
|                            |                           | — —                        | Habrobracon gelechiae      |
|                            |                           | — —                        | Hemerocampa leucostigma    |
|                            |                           | — —                        | Hemiteles pimplae          |
|                            |                           | — —                        | Hyphantria cunea           |
|                            |                           | — —                        | Malacosoma americana       |
|                            |                           | — —                        | Meteorus communis          |
|                            |                           | — —                        | — hyphantriae              |
|                            |                           | — —                        | Microbracon sp.            |
