1. Zoological Society of London.

17th March, 1891. — Mr. Sclater exhibited and made remarks on some horns with scalps attached of an Antelope sent to him from Somali-Land by Capt. H. G. C. Swayne, R.E., which he referred to the lately described *Cervicapra Clarkii* of Mr. Oldfield Thomas. — Mr. Sclater also exhibited two skins of the Ounce (*Felis uncia*) in reference to the specimen of this Cat lately acquired by the Society, and made some remarks on the geographical range of the Ounce in Central Asia. — Mr. A. Smith Woodward, F.Z.S., gave an account of some dermal plates of *Homosteus* from the Old Red Sandstone of Caithness, lately sent to him by Mr. Donald Calder, of Thurso, the examination of which had enabled him to advance our knowledge of some points in the structure of this remarkable form of extinct fishes. — Mr. G. A. Boulenger, F.Z.S., gave a detailed description of Simony's Lizard (*Lacerta Simonyi*) from the large specimen lately living in the Society's Gardens, which had been brought from the rock of Zalmo, Canaries, by Canon Tristram. — Mr. W. F. Kirby, F.E.S., gave an account of a small collection of Dragon-flies made by Mr. E. E. Green in Ceylon. The series contained examples of sixteen species, of which three appeared to be new to science. — Mr. Oldfield Thomas read some notes on the specimens of Antelopes procured by Mr. T. W. H. Clarke in Somali-Land, which had been submitted to his examination by Messrs. Rowland Ward and Co. The specimens were referred to eight species. One of these, already preliminarily described as *Cervicapra Clarkii*, was now regarded as constituting a new generic form allied to the Gazelles, and proposed to be called *Ammodorcas Clarkii*. — P. L. Sclater, Secretary.

2. Deutsche Zoologische Gesellschaft.

Die Deutsche Zoologische Gesellschaft hielt vom 2. bis 4. April ihre erste Jahresversammlung in Leipzig ab, wo sie im Zoologischen Institute eine gastliche Aufnahme fand. In der ersten Sitzung begrüßte zunächst der Vorsitzende, Herr Geh. Hofrath Prof. Leuckart, die zahlreich Erschienenen durch eine längere, die Entwicklung und die Aufgaben der heutigen zoologischen Wissenschaft darstellenden Rede. Hierauf gab der Schriftführer, Herr Prof. Spengel-Gießen,
