

Type material: Lectotype ♂ labelled "Palemb.B...?; 5&6/78/Hydromanicus flavoguttatus Albarda ♂ (unknown handwriting)/Sum. Exp.7/Type/Cat. N°8/Museum Leiden, Hydromanicus flavoguttatus Alb./Genitalia prep. PT-1623 ♂, A.Neboiss, 1986". - Paralectotype ♀, same locality and date, Cat.N°9, Genitalia prep. PT-1665 ♀, A.Neboiss, 1986". - Paralectotype ♂ "Ar.Bk.S.77/Sumatra/Cat.N°10" (Ar.Bk.=Ajer Boesoek). - All three specimens in Leiden Museum. Length of forewing 10,5-11mm.

Described from Palembang and Ajer Boesoek, Sumatra. The males are distinguished by the shape of inferior appendages and the ventro-apical hook-like process of the phallus. In female tergite VIII with broad lateral lobe; tergite IX with slender elongate lateral projection; segment X distally covered with small hooked projections.

TRICH-L Internet Discussion List

Trichoptera Colleagues:

In response to your enthusiastic encouragement at the Symposium last summer in Minnesota, I am pleased to announce the establishment of an electronic discussion group for Trichoptera: Trich-L.

The purpose of the discussion group list is to allow rapid communication among all Trichoptera colleagues globally who have internet access. Any and all topics that are likely to be of general interest to Trichoptera scientists and that can be expressed in relatively short messages are encouraged. Please note that this service, while we intend it to be permanent, is presently experimental for us. (I thank, especially, Mr. Ken Allen, computer technician in my department, for doing most of the work to help establish our list.)

This is not expected to displace BRAUERIA for communicating among trichopterologists. BRAUERIA serves the important purpose of providing news of a more lasting nature.

Communication among individual Trichoptera scientists will certainly continue through the various means already in operation, including E-mail.

To subscribe to the discussion group list, send the following message IN THE BODY ONLY:

subscribe Trich-L your name (for example: subscribe Trich-L john morse)

to the following address:

cuentsubscribe@entoinfo.clemson.edu

If you are using Quickmail (CE Software), you should use the "Plain Memo" form ONLY for sending to cuentsubscribe any commands such as the "subscribe" command above. (This constraint does not apply to any messages you may want to send to the discussion group.)

If everything works correctly, you will receive confirmation that you are subscribed to Trich-L. You will also receive further instructions about communicating through this list. I encourage you to save the message you receive and also to ask for the HELP message (instructions provided in the initial response) in order to keep on file a complete set of instructions.

If you have questions about the operation of Trich-L, please ask me directly.

John C. Morse, PhD

OBITUARIES

We learn with sadness of the death of two of our old friends, who were among the first to join as participants in the First International Symposium on Trichoptera in 1974.

Dr. Janett Florin

of Kronbühl, Switzerland, died on 27 January 1996 at the age of 78 after a long illness. He was a quiet and friendly man, and worked on the faunistics of Trichoptera and Lepidoptera in Switzerland. He published several papers on the caddisflies of Central and Eastern Switzerland and Liechtenstein between 1980 and 1992.

Janett Florin in Lunz, 1974 (centre; with M.I.Crichton and O.S.Flint)

Dr. Sándor Ujhélyi

of Budapest, Hungary, died on 19 May 1996 at the age of 95. He was one of the pioneers in the study of Trichoptera and some smaller insect orders in Hungary, and published several papers on caddisflies between 1971 and 1986. His collection is now in the Hungarian Natural History Museum.

We shall remember these friends.

Sándor Ujhélyi in Lunz, 1974 (with M.Marinković)
