Corrigenda ad SCHILLHAMMER 2000 – A new name and corrected illustration plates (Insecta: Coleoptera: Staphylinidae)

H. Schillhammer*

Abstract

A new name, *Gabrius parallelcollis* nom.n., is proposed for *G. linearis* SCHILLHAMMER, 2000 (nec CASEY, 1915). Corrected versions of three faulty illustration plates from SCHILLHAMMER 2000 are provided.

Zusammenfassung

Gabrius linearis SCHILLHAMMER, 2000 (nec CASEY, 1915) wird in *G. parallelcollis* nom.n. umbenannt. Drei fehlerhafte Abbildungstafeln aus SCHILLHAMMER 2000 werden in korrigierter Form wiedergegeben.

Key words: Insecta, Coleoptera, Staphylinidae, Staphylininae, Staphylinini, Philonthina, *Gabrius*, new name, illustration plates, corrigenda.

***Gabrius parallelcollis* nom.n.**

Gabrius linearis SCHILLHAMMER, 2000: 138 (nec CASEY 1915).

In my recent *Gabrius* paper (SCHILLHAMMER 2000), I described a new species (*Gabrius linearis*) from the Philippines, but overlooked that this name was preoccupied by *G. linearis* CASEY, 1915 (now a synonym of *G. shulli* HATCH, 1957). I therefore propose to replace *G. linearis* SCHILLHAMMER, 2000 by *G. parallelcollis* nom.n.

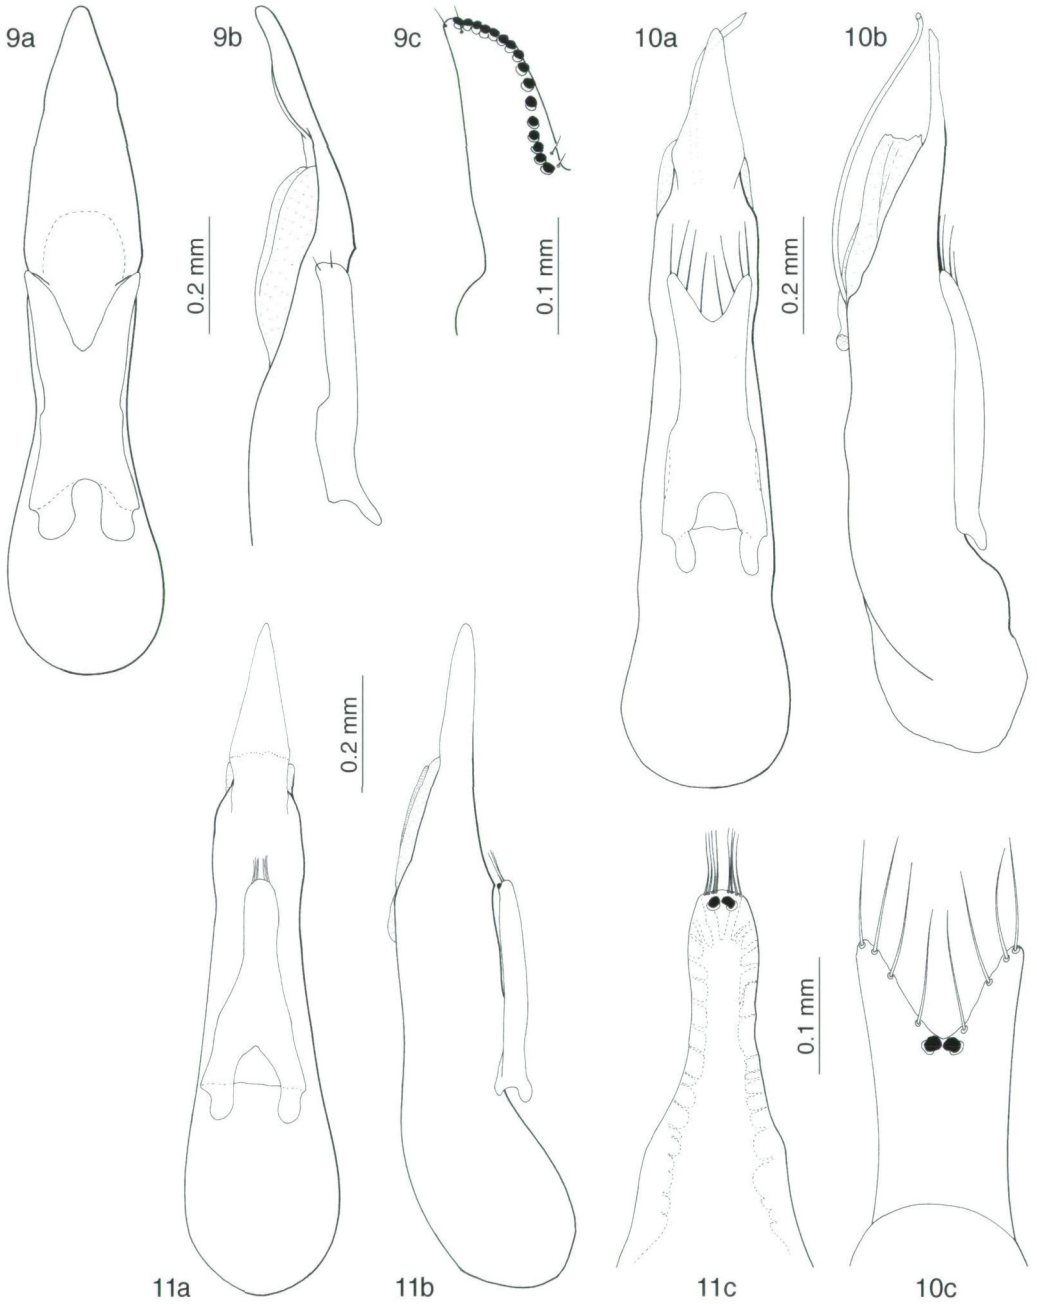

Illustration plates

Additionally, I detected several severe mistakes in the illustration plates which I had overlooked when reviewing the proofs: pp. 131, 140, 141. Since the mistakes are simply too numerous and too intricate to just mention them, I have decided to provide corrected versions of the respective plates.
