To the knowledge of the Asiatic species of the genus *Trechus* CLAIRVILLE

(Insecta: Coleoptera: Carabidae)

I.A. Belousov & I.I. Kabak

Annalen des Naturhistorischen Museums in Wien 98 B: 361-398

Auf dem Weg von der Redaktion in die Druckerei gingen leider vier Abbildungen (Figs. 36 - 39) verloren, die zur oben erwähnten Arbeit gehören. Sie werden hier als Ergänzung abgedruckt.

On the way to the printers unfortunately four figures (Figs. 36 - 39), which are part of the article mentioned above, got lost. They are printed here as an addition.

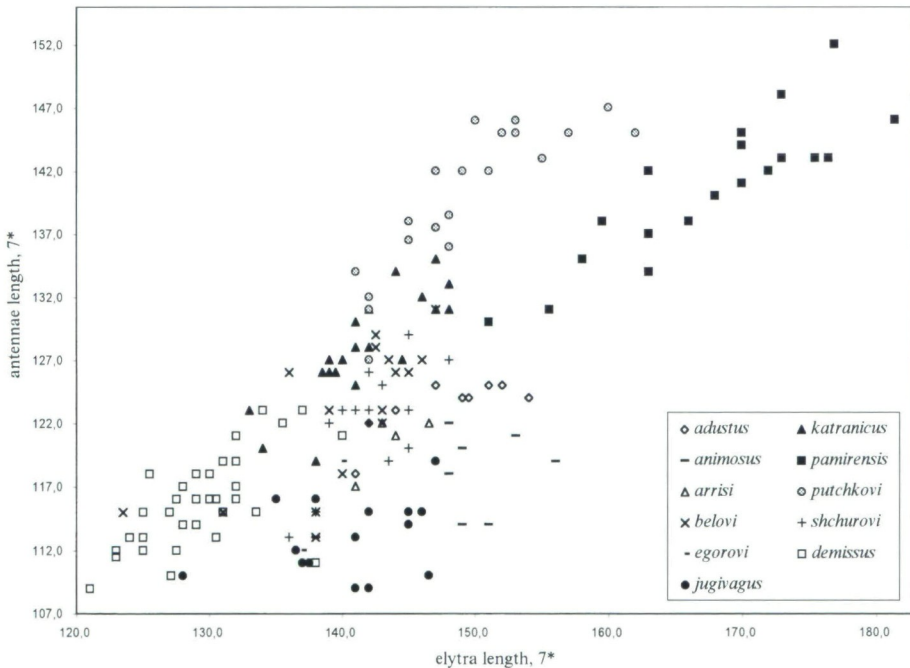

Fig. 36: Antennae and elytra length in species of *adustus*-group.

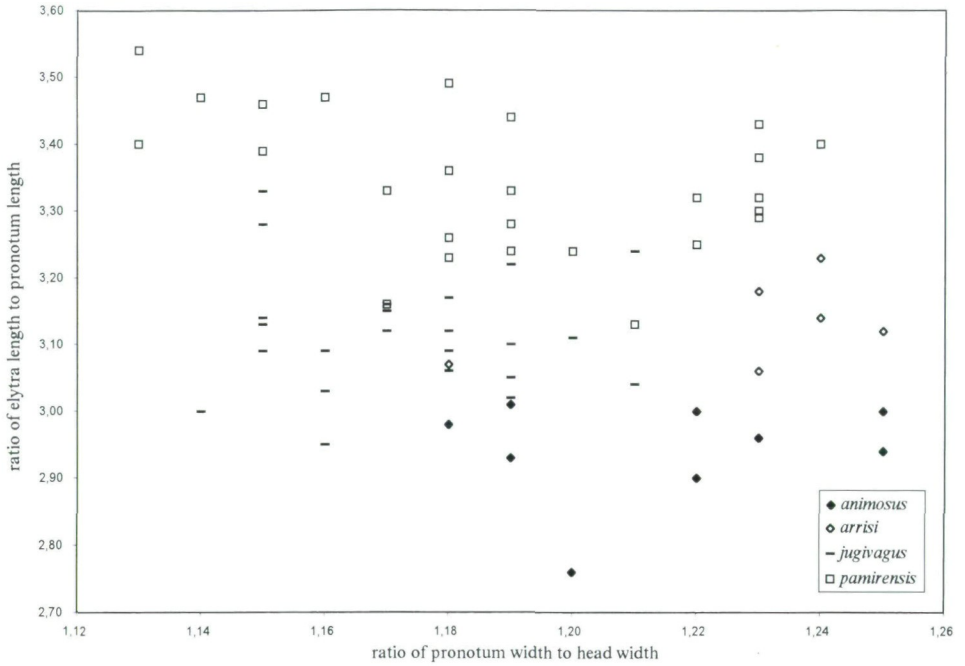

Fig. 37: Proportions of some species belonging to *T. adustus*-group.

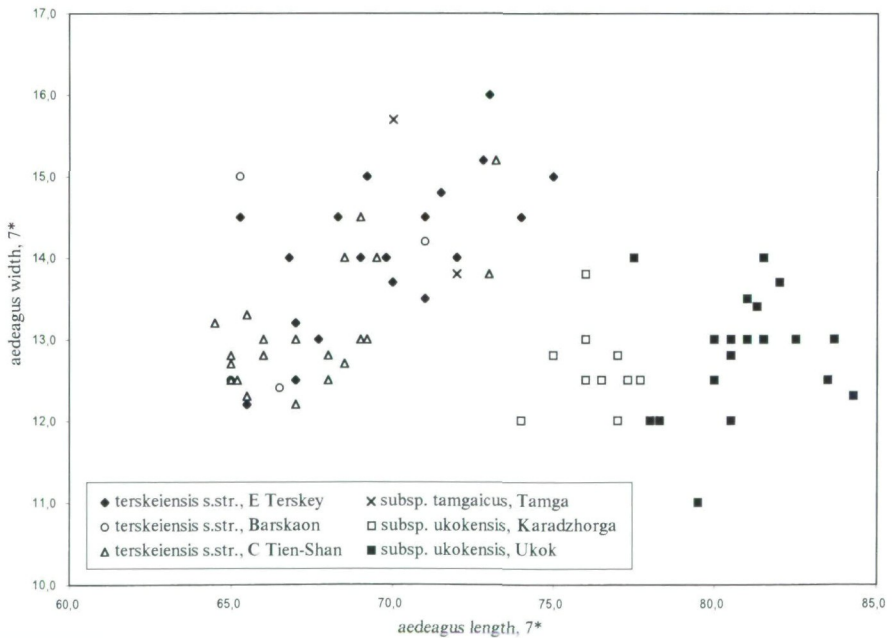

Fig. 38: Ratio of aedeagus length to width in different races of *Trechus terkeiensis*.

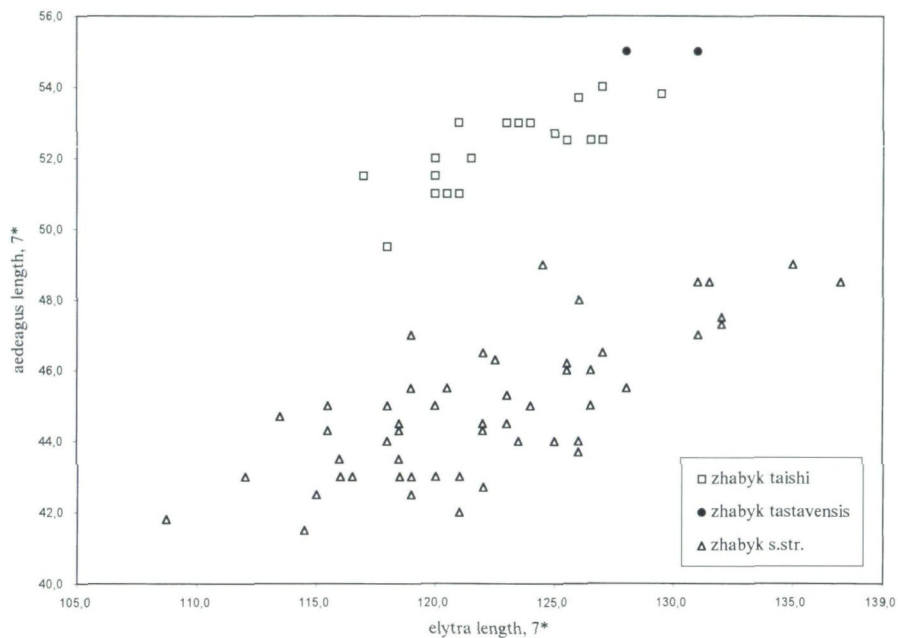

Fig. 39: Ratio of aedeagus length to length of elytra in different subspecies of *Trechus zhabyk*.
