

New names for two taxa of Helicoidea s. lat.

(Gastropoda: Pulmonata).

By

A. A. SCHILEYKO,
Moscow.

In my book "Terrestrial molluscs of superfamily Helicoidea of the USSR fauna" (1978: 335) was established the genus *Steklovia* [fam. Helicidae, type species *Caucasotachea* (?) *maslovae* STEKLOV 1966]. However, in 1972 by SCHLICKUM & STRAUCH (Arch. Moll., 102 (1/3): 73) was proposed the generic name *Steklovia* [Lindholmiolidae, type species *Steklovia koehnei* SCHLICKUM & STRAUCH 1972]; in 1976 by GOZHIK & PRYSJAZHNJUK (Palaeont. sbornik, 13: 56 [in Russian]) also was proposed the generic name *Steklovia* [fossil Planorbidae, type species *Steklovia jaroslavi* GOZHIK & PRYSJAZHNJUK 1976].

Therefore I propose *Stekloviella* nom. nov. (type species *Caucasotachea maslovae* STEKLOV 1966) instead of *Steklovia* SCHILEYKO 1978, and this binomen must read as *Stekloviella maslovae* (STEKLOV 1966).

In the same book, on the page 178 was proposed the subgeneric name *Narina* SCHILEYKO [genus *Leucozonella* (Hygromiidae: Trichiinae)]. This name also was preoccupied by DISTANT 1906 (Trans. S. Afr. phil. Soc., 16: 413; Insecta: Hemiptera). I propose the name *Narinula* nom. nov. (type species *Fruticicola hypophaea* LINDHOLM 1927).

I express my gratitude to Dr. A. ZILCH for indication of these homonyms.
