

Corrigendum: Revision of recluse spiders (Araneae: Sicariidae: *Loxosceles*) preserved in Dominican amber and a total-evidence phylogeny of Scytodoidea reveal the first fossil Drymusidae. Arthropod Systematics & Phylogeny 80: 541–559. doi: 10.3897/asp.80.e86008

Ivan L. F. Magalhaes, Abel Pérez-González, Facundo M. Labarque, Martín Carboni, Jörg U. Hammel, Robin Kunz, Martín J. Ramírez, Mónica M. Solórzano-Kraemer

In our previous contribution, “Revision of recluse spiders (Araneae: Sicariidae: *Loxosceles*) preserved in Dominican amber and a total-evidence phylogeny of Scytodoidea reveal the first fossil Drymusidae” (Arthropod Systematics & Phylogeny 80, 2022, 541–559), Table 1 was inadvertently missing from the final published version. It is included in the present Corrigendum.

Table 1. Data sources for phylogenetic analysis. Sanger sequences of *Drymusa armasi* are available from GenBank but were not used in the analysis, as per Labarque et al. (2017). Additional SRAs* were processed in the phytree pipeline but are not listed in the table since they were not used in downstream phylogenetic analyses.
