PROTOPAPADAKIS, EVANGELOS D. (Ed., 2012)

Animal Ethics. Past and Present perspectives

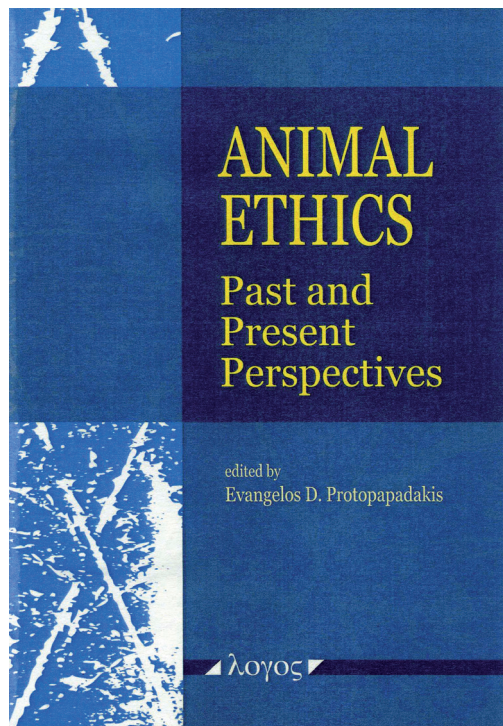

Logos-Verlag: Berlin GmbH
in engl. Sprache; 295 Seiten

ISBN: 978-3-8325-2999-4; Preis 29,00 €

The editor is Lecturer in Applied Ethics at the National and Kapodistrian University of Athens, Greece.

The book is divided between the presentation and discussion of a range of influential past approaches to animal ethics and an equally significant range of contemporary approaches. It provides contributions of experts from various disciplines (various universities). Thus it closes a gap by offering a broad analysis of the subject.
