A preliminary checklist of the Papuan-Australian taxa of the tribus Saturniini BOISDUVAL, 1837 (“1834”) (Lepidoptera: Saturniidae)

Eine vorläufige Scheckliste der Taxa der Tribus Saturniini BOISDUVAL, 1837 („1834”) der papuanisch-australischen Fauna (Lepidoptera: Saturniidae)

Zusammenfassung: Die Saturniiden der Tribus Saturniini BOISDUVAL, 1837 (“1834”) der Unterfamilie Saturniinae BOISDUVAL, 1837 („1834”) (Lepidoptera: Saturniidae) der papuanisch-australischen Fauna wurden in speziellen Beiträgen zur Kenntnis der wilden Seidenspinner des indonesischen Archipels in kommentierten vorläufigen Einzelschecklisten dargestellt, vgl. U. Paukstadt & L.H. Paukstadt (2012a-o). Nachfolgend präsentieren wir eine bereits überarbeitete Gesamtscheckliste. Es dürften gelegentlich unterschiedliche Interpretationen zu Texten in Schriften und zur Taxonomie einzelner Taxa vorliegen. Wir sind deshalb dankbar für weitere Hinweise, Kritik und Diskussionen und planen, die nun komplett vorliegende Scheckliste der Saturniini der papuanisch-australischen Fauna gegebenenfalls in Supplementbänden zu ergänzen.

Abstract: The wild silkmoths of the tribe Saturniini BOISDUVAL, 1837 (“1834”) of the subfamily Saturniinae BOISDUVAL, 1837 (“1834”) (Lepidoptera: Saturniidae) of the Papuan-Australian fauna were listed within preliminary annotated checklists in several special contributions to knowledge the wild silkmoths of the Indonesian Archipelago, cf. U. Paukstadt & L.H. Paukstadt (2012a-o). We herewith present an additional updated checklist for the complete taxa of the Papuan-Australian Saturniini. Our interpretation of text in literature and status of taxa might occasionally differ widely from interpretations recorded by other authors. Any kind of further hints, critics and discussions therefore are highly appreciated. We are planning to issue supplements to this checklist if considered needed.
