Introduction

Subfamily Helconinae is presented by 3 species from 3 genera, subfamily Brachistinae by 17 species from 4 genera and subfamily Euphorinae by 28 species from 12 genera, subfamily Macrocentrinae by 4 species from 1 genus in the entomological collection of the Institute of Zoology NAS of Azerbaijan. The paper includes distribution remarks and host range information for each species. The whole distribution areas in the world are provided for each taxon. Each name of species is accompanied by the author's name and description date. A map showing collection areas in Azerbaijan is presented.
