

BUPRESTIS

A semi-annual newsletter devoted to the dissemination of information about buprestids and students of this group

Editor: Hans Mühle

Dear friends,

it's now already two years that you received the last newsletter. I came across with Chuck that he will bring the necessary news on his homepage.

In the meantime I have been asked for the next issue of this newsletter several times. On the other hand some of us think that BUPRESTIS is superfluous. But not everybody of us has access to the online edition of the Zoological Record. And beside the information about new literature and taxons and taxonomical changes we have also the possibility to keep in touch with each other. Where else is the platform to ask the colleagues for needed material (literature, species) or information? My contribution will be to gather all that news and questions and serve you with a compilation in time.

I take off my hat to Chuck who has been a friend for long years. I am glad to say that I could discuss and laugh and travel with him. It was a fruitful time.

Many thanks to all of you, who have sent me files or copies of their work. Your contribution makes BUPRESTIS a newsletter that is worthwhile to read.

If you want that we continue this newsletter, please send me your news up to 30 June 2014.

All my very best wishes to you and your families for Christmas and a prosperous New Year.

Hans
