

## Namenverzeichnis der Großschmetterlinge der Nordmark

(Schleswig-Holsteins, Lübecks und Lauenburgs, einschließlich der  
nordelbischen Gebietsteile Hamburgs).

Als Vorläufer einer Fauna  
der Großschmetterlinge der Nordmark.

Von G. Warnecke, Kiel.

(Fortsetzung.)

### Bombycidae.

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

 164. *Aglia tau* L.  
 165. *Drepana falcataria* L.  
 166. *Drep. curvatula* Bkh.  
 167. *Drep. harpagula* Esp. (Hamburg).  
 168. *Drep. lacertinaria* L.  
 169. *Drep. binaria* Hfn.  
 170. *Drep. cultraria* F.  
 171. *Cilix glaucata* Sc.

### Noctuidae.

172. *Panthea coenobita* Esp.  
 173. *Dipththera alpium* Osbeck.  
 174. *Demas coryli* L.  
 175. *Acronycta leporina* L. subsp. *grisea* Cochr.  
 176. *Acr. aceris* L.  
 177. *Acr. megacephala* F.  
 178. *Acr. alni* L.  
 179. *Acr. strigosa* F. (Lauenburg, Holstein).  
 180. *Acr. tridens* Schiff.  
 181. *Acr. psi* L.  
 182. *Acr. cuspidis* Hb.  
 183. *Acr. menyanthidis* View.  
 184. *Acr. auricoma* F.  
 185. *Acr. euphorbiae* F.  
 186. *Acr. rumicis* L.  
 187. *Craniophora ligustri* F.  
 188. *Simyra nervosa* F. (mittleres Ostholstein).  
 189. *Arsilonche albovenosa* Goeze (Hamburg, westliches Holstein).  
 190. *Agrotis strigula* Thnbg.  
 191. *Ag. subrosea* Steph. subsp. *rubrifera* Warn.  
 192. *Ag. signum* F. (Hamburg, Lauenburg).  
 193. *Ag. janthina* Esp.  
 194. *Ag. fimbria* L.  
 195. *Ag. interjecta* Hb. (Hamburg).  
 196. *Ag. augur* F.  
 197. *Ag. obscura* Brahm. (Hamburg, Lübeck).  
 198. *Ag. pronuba* L.  
 199. *Ag. orbona* Hfn.  
 200. *Ag. comes* Hb.  
 201. *Ag. castanea* Esp.  
 202. *Ag. agathina* Dup.  
 203. *Ag. triangulum* Hfn.  
 204. *Ag. baja* F.  
 205. *Ag. candelarum* Stgr. (mittleres Ostholstein).  
 206. *Ag. c-nigrum* L.  
 207. *Ag. ditrapezium* Bkh. (Hamburg).  
 208. *Ag. stigmatica* Hb.  
 209. *Ag. xanthographa* F.  
 210. *Ag. umbrosa* Hb.  
 211. *Ag. dahlii* Hb.  
 212. *Ag. rubi* View.  
 213. *Ag. florida* Schmidt.  
 214. *Ag. brunnea* F.  
 215. *Ag. primulae* Esp.  
 216. *Ag. depuncta* L. (im östlichen Teil, von Flensburg bis Lauenburg).  
 217. *Ag. glareosa* Esp. (Hamburg, Flensburg).  
 218. *Ag. plecta* L.  
 219. *Ag. simulans* Hfn. (wenig beobachtet).  
 220. *Ag. putris* L.  
 221. *Ag. cinerea* Hb. (bisher selten).  
 222. *Ag. exclamationis* L.  
 223. *Ag. ripae* Hb. (an den Küsten, an der Niederelbe bei Hamburg).  
 224. *Ag. cursoria* Hfn.  
 225. *Ag. nigricans* L.  
 226. *Ag. lidia* Cr. (Hamburg, westliches Schleswig).
