

Die Witterung 1986

Fritz Aigner

Einem milden Jänner mit viel Niederschlag und auch guter Schneelage folgte ein trockener und kalter Februar. Der Monat März war kühl und trocken; trocken war auch der April, der aber wärmer als normal war. Mit Ausnahme des August war der Sommer ziemlich kühl. Herbst und Winterbeginn waren temperaturmäßig durchschnittlich. - Die Niederschläge blieben außer im Jänner, Mai, Oktober und Dezember unter dem langjährigen Mittel. Die Mitteltemperaturen der Monate glichen weitgehend dem Durchschnitt, nur die des Februar lag tief darunter. Das Jahresmittel der Temperatur liegt dadurch um 0,1° unter dem langjährigen. Die Schneedecke blieb bis 24. März geschlossen und entsprach dem Durchschnitt.
