COLEOPTEREN VON JAPAN.

VON

H. VON SCHOENFELDT,

Oberst z. D. -- Correspondirendes Mitglied des Nassauischen Vereins für Naturkunde,
Ehrenmitglied des Offenbacher Vereins für Naturkunde, Mitglied der Deutschen Entomolog.
Gesellschaft u. d. Entomolog. Vereins zu Berlin, sowie der Soc. Entomologique de Belgique.

Zweiter Nachtrag.

Herr G. Lewis lässt es sich angelegen sein, einzelne Familien seiner enormen, fast unerschöpflich erscheinenden Coleopterenausbeute, stammend von seinen Reisen in Japan, entweder selbst zu bearbeiten oder familienweise hervorragenden Entomologen wie den Herren D. Sharp, E. Reitter, Champion, Gorham, Belon p. p. zur Bearbeitung zu übergeben.

Die letzten Jahre brachten einen Zuwachs von 512 Arten, dagegen mussten 7 Arten abgerechnet werden, theils weil sie nicht in Japan vorkommen, theils weil sie doppelt beschrieben und benannt wurden. Es erweitert sich die Zahl der bis jetzt aus Japan bekannt gewordenen Coleopteren von 2754 Arten auf 3259 Arten.
