On the identity of *Anthobium laterale* (LUZE 1911) (Coleoptera: Staphylinidae: Omaliinae)

V. ASSING

A b s t r a c t : Based on an examination of the holotype of the junior name, the following synonymy is proposed: *Anthobium unicolor* (MARSHAM 1802) = *A. laterale* (LUZE 1911), syn. n.

K e y w o r d s : Coleoptera, Staphylinidae, Omaliinae, *Anthobium*, Palaearctic region, Caucasus, taxonomy, new synonym.

Anthobium unicolor (MARSHAM) (Figs 1-2)

Lathrimaeum laterale LUZE 1911: 293, syn. n.

T y p e e x a m i n e d : Holotype ♂: Caucasus occ., Krasnaja Poljana [in Cyrillic], Roubal VII.1910 / Type laterale m. Luze / Typus Lathrimaeum laterale Luze / ex coll. Luze / Holotypus Lathrimaeum laterale Luze rev. V. Assing 2004 / *Anthobium unicolor* (Marsham) det. V. Assing 2004 (Naturhistorisches Museum Wien).

The original description of *Anthobium laterale* (LUZE) is based on a single holotype from Krasnaja Poljana (western Caucasus), which LUZE (1911) compares with *Anthobium atrocephalum* (GYLLENHAL). This holotype was examined, but no morphological evidence whatsoever was found suggesting that it should be specifically distinct from *A. unicolor* (MARSHAM), a species not even mentioned in the original description. Therefore, *A. laterale* LUZE is here placed in the synonymy of the senior name *A. unicolor* (MARSHAM). For illustrations of the habitus of the holotype and the labels see Figs 1-2.

Acknowledgement

I am most grateful to Harald Schillhammer, Naturhistorisches Museum Wien, for arranging a loan of the holotype of *Lathrimaeum laterale*.

Zusammenfassung

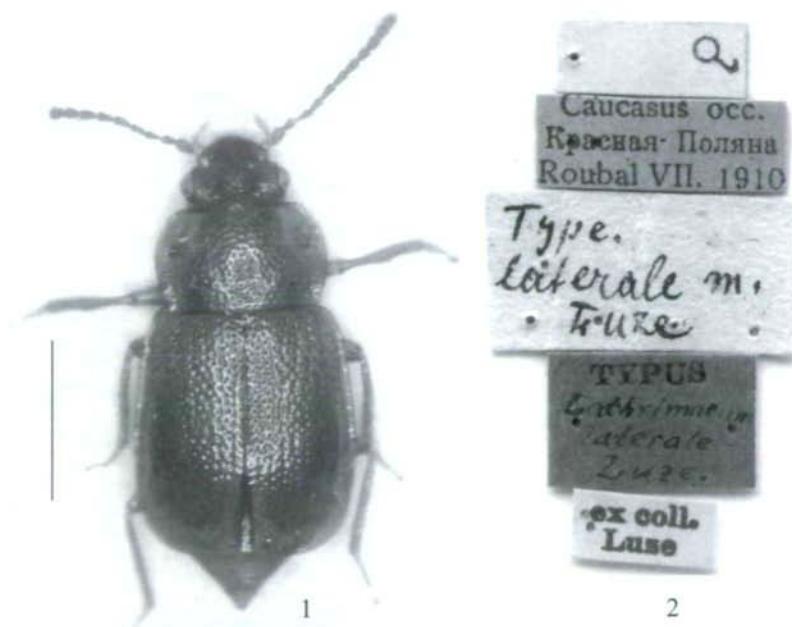

Anthobium laterale (LUZE 1911), syn. n. wird mit *A. unicolor* (MARSHAM 1802) synonymisiert.
