Folgende Quellen wurden für den vorliegenden Atlas ausgewertet:

1. Datenlage vor der Exkursion:

Von Prof. Dr. Harald Niklfeld wurde uns ein Teilausdruck der Österreichischen Florenkartierung für die entsprechenden Quadranten zur Verfügung gestellt. Dieser enthält die Kartierungsdaten bis zum Jahre 1985.
Prof. Dr. Niklfeld sei dafür herzlichst gedankt!

Die Taxonomie richtet sich so weit wie möglich nach ADLER, W., OSWALD, K. & FISCHER, R. 1994: Exkursionsflora von Österreich, Stuttgart - Wien.

Die deutschen Namen stammen ebenfalls aus diesem Werk. Es wurde grundsätzlich der erste dort angegebene Name gewählt. Auf eine Anpassung an die im Kartierungsgebiet üblichen Pflanzennamen wurde aus Zeitgründen verzichtet. Sie wäre aber äußerst wünschenswert. Um dem Nichtbotaniker das Auffinden einer Verbreitungskarte zu erleichtern, wurde ein Verzeichnis der verwendeten deutschen Gattungsnamen angefügt.
