FLORA OF TROPICAL EAST AFRICA INDEX OF COLLECTING LOCALITIES

R. POLHILL

The index contains about 8000 entries of localities determined for citations and distribution records in the Flora. Each entry gives the geographical division of the Flora, co-ordinates and collectors ; spellings of place names have been standardized as far as possible. The text is set on tape of an automatic typewriter, so that entries can be added and corrected without resetting the whole. A limited first edition will be issued in the Autumn of 1970 to collectors, authors and botanical institutes for the purpose of obtaining additions and corrections. The second enlarged edition will be available for purchase in 1972 or 1973 and subsequent editions will be produced from time to time.
