Veranstaltungshinweis

A first Symposium, intitled “Symposium of the Hermit beetle”, took place in Sweden in August 1999. Three years later, the “2nd Symposium and Workshop on the Conservation of Saproxylic Beetles in Ancient Trees” was held in Great Britain in June 2002. During the “3rd Symposium and Workshop on the Conservation of Saproxylic Beetles”, that took place in Latvia in July 2004, we suggested that the fourth conference could be held in France.

We suggest you that the “4th Symposium and Workshop on the Conservation of Saproxylic Beetles” will take place in France, near Le Mans, from the 27th to the 29th of June 2006.

Two days, the 27th and the 28th of June, will be dedicated to the plenary sessions and the posters presentations. The third day of the symposium will be dedicated to a field trip, in the agricultural landscapes (hedgerows, chestnut orchards in witch occur *Osmoderma eremita*, *Gnorimus variabilis*, *Liocola lugubris*, *Cerambyx cerdo*, *Lucanus cervus*...).

Your proposals of papers are welcome.

A first programme and information for the registration is available at:
