

On the identity of *Cryptophagus bipedes* Bruce, 1963

(Coleoptera: Cryptophagidae)

Jens ESSER

Abstract: The examination of both unidentified specimens and the types of *Cryptophagus bipedes* Bruce, 1963 and *C. schuberti* Bruce, 1963 showed that only *C. schuberti* is a junior synonym of *C. dilatipennis* Reitter, 1888. Consequently *C. bipedes* is considered a proper species.

Zusammenfassung: Die Untersuchung von unbestimmten Tieren und der Typen von *Cryptophagus bipedes* Bruce, 1963 und *C. schuberti* Bruce, 1963 erbrachte, dass nur *C. schuberti* ein Synonym von *Cryptophagus dilatipennis* Reitter, 1888 ist. *C. bipedes* wird deshalb wieder als gute Art angesehen.

Key words: Coleoptera, Cryptophagidae, Cryptophaginae, revalidated species, Turkey, *Cryptophagus*.

Introduction

Among numerous specimens from Turkey I studied in the past, I found two forms of *Cryptophagus dilatipennis* Reitter, 1888. I compared them with the holotypes of *C. dilatipennis* Reitter, 1888, *C. bipedes* Bruce, 1963 and *C. schuberti* Bruce, 1963, and recognised that *C. bipedes* is a valid species which is separated from *C. dilatipennis* by a few characters in the male genitalia, and the shape of the pronotum and elytra, respectively.

BRUCE (1963) described three *Cryptophagus* species from Anatolia (Turkey). Later, JOHNSON (2007) synonymised *C. bipedes* and *C. schuberti* with the Caucasian *C. dilatipennis*.

Taxonomy

Cryptophagus dilatipennis Reitter, 1888

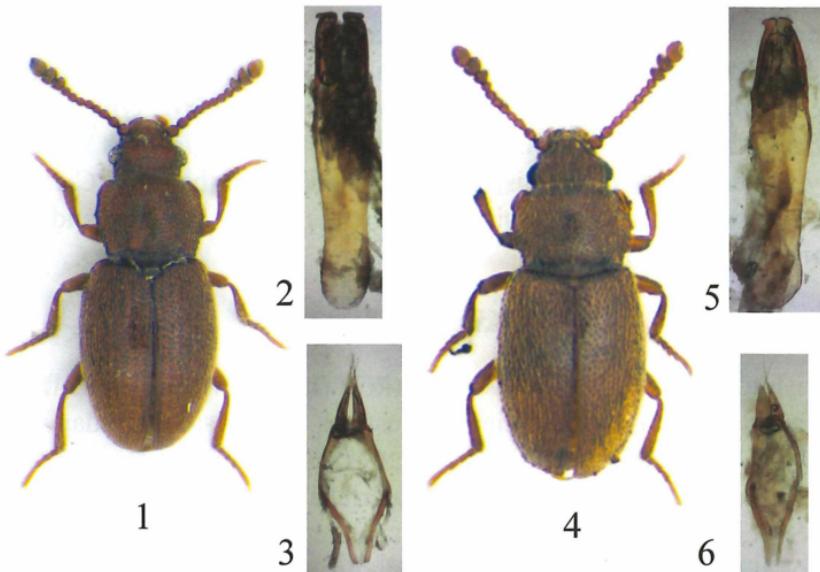

Specimens examined: Holotype (δ) and three paratypes (unknown sex) from Caucasus, leg. LEDER [NHMUS]; one specimen (no type, but donated by REITTER) from West Caucasus, leg. LEDER, REITTER [NHMW]; 1 δ , 1 φ from Teberda (Russia, West-Caucasus) [cEs]; 2 δ , 1 φ from Ilyich (Russia, West-Caucasus) [cEs & cPü]; 1 δ from Guamka (Russia, West-Caucasus) [cPü]; 3 δ , 1 φ from Otdalennyy (Otdalennyy) (Russia, West-Caucasus) [cEs & cPü]; 1 δ from Manglisi (Georgia, Algeti Nat. Park) [cEs]; 1 δ from Rize (Turkey) [cPü]. Furthermore the typical specimens of *C. schuberti* Bruce, 1963 (see below).

Cryptophagus bipedes Bruce, 1963

Specimens examined: Holotype (δ) and three paratypes (δ) from Cangal dagh (Turkey, province of Kastamonu), leg. SCHUBERT [NHMW] (see BRUCE, 1963); two paratypes [ZMLU]; 27 specimens from the same locality like the types [NHMW]; 1 δ from Ilgazdagı-Geç (Turkey, province of Kastamonu), leg. RIEDEL [SMNS]; 1 δ from Tosya (Turkey, province of Kastamonu), leg. WUNDERLE [ZMB]; 2 δ and 1 φ from Bolu (North Anatolia, province of Bolu), leg. BRACHAT & MEYBOHM [cEs]; 6 δ , 1 φ from Gümüşhane [cEs & cPü].

Cryptophagus schuberti Bruce, 1963

Specimens examined: Holotype (δ) from Borcka (Turkey, province of Artvin), leg. SCHUBERT [NHMW] (see BRUCE, 1963) and one paratype with the same data [ZMLU]. The holotype is identical with the types and recent specimens of *C. dilatipennis* Reitter, 1888: *C. schuberti* Bruce, 1963 = *C. dilatipennis* Reitter, 1888.

Figs 1–6: *Cryptophagus* spp. 1–3 *C. dilatipennis* Reitter, 1888, (1) habitus male (2) medianlobus (3) parameres, 4–6 *C. bipedes* Bruce, 1963 stat. rev. (4) habitus male (5) medianlobus (6) parameres.

Catalogue

Cryptophagus bipedes Bruce, 1963 stat. rev.

Cryptophagus dilatipennis Reitter, 1888

Cryptophagus delicatulus Roubal, 1913

- junior synonym

Cryptophagus schuberti Bruce, 1963

- junior synonym

Key

1. Elytra more rounded (Fig. 1), tip of the medianlobus and parameres like in Figs 2–3 *Cryptophagus dilatipennis* Reitter, 1888
- Elytra more elongated (Fig. 4), tip of the medianlobus and parameres like in Figs 5–6 *Cryptophagus bipedes* Bruce, 1963

Distribution

Currently *Cryptophagus bipedes* is known only from the Northwest of Turkey (provinces Bolu and Kastamonu). *Cryptophagus dilatipennis* is recorded from the Northeast of Turkey (JOHNSON et al. 2007, type series of *C. schuberti*), but considering the confusion with *C. bipedes* it is not possible to say something about the distribution in Turkey. Furthermore *C. dilatipennis* is recorded from the Russian Southern Territory, Armenia and Georgia (JOHNSON et al. 2007, cEs).

Acknowledgements

I wish to thank Christoffer FÄGGERSTRÖM (Lund, Sweden), Manfred JÄCH and Harald SCHILLHAMMER (Vienna, Austria), Ottó MERKL (Budapest, Hungary), Andreas PÜTZ (Eisenhüttenstadt, Germany) and Wolfgang SCHAWALLER (Stuttgart, Germany) for loaning material and allowing to visit the collections. Special thanks to Volker BRACHAT (Geretsried, Germany) and Heinrich MEYBOHM (Stelle, Germany) for donating a lot of specimens from Turkey and Georgia.
