Systematics – applied?

The perception of many scientists of applied systematics is that of a “technical or commercial usability”. The annual meeting of NOBIS will try to put applied systematics into a different perspective. Systematics is the base of environmental biology, conservation policy, parasitology and related health care, just to mention few “applied” examples. Systematic studies are also the headstone to test evolutionary models – an application far from direct commercial use. In Earth Sciences, systematics is the base for biostratigraphy and palaeobiogeography which in turn reflects palaeogeographical patterns. Many of these topics show great overlaps between life- and earth sciences and are thus perfect subjects for our annual NOBIS meeting.

Venue	Institute for Earth Sciences, University of Graz, Heinrichstraße 26, Graz
Organizer	Prof. Dr. Werner E. Piller
Program	02. 12. 2010 General Assembly of NOBIS, Icebreaker 03. 12. 2013 Presentations
Oral presentations	Contributions are limited to 15 minutes
Language	German or English German talks should be illustrated with slides in English
Poster	Preferred poster format is A0; each contributor will have the possibility for a 1-2 min presentation during the poster session
Abstracts	Please use the attached abstract-form. Abstracts should not exceed one page and should be written in English. Please send the abstract to: franziska.anderle@nhm-wien.ac.at Deadline for abstract submission: 2. November 2010
Fees	NOBIS-members €30.-; non-members €50.-
Payment	NOBIS Austria - GRAZ Account number: 288-226-679/00 Bank code: 20111 (Erste Bank) or at registration desk
