

Butterfly Conservation's 2nd International Symposium

Conserving Lepidoptera in a Changing Environment

University of Warwick, UK
6-8th September 1996

Following the successful 1st Symposium at Keele University in September 1993, Butterfly Conservation is to hold its 2nd International Symposium in 1996.

The Symposium will be organised as a series of thematic sessions covering a wide range of subjects involved in the conservation of Lepidoptera, with particular emphasis on the problems of environmental change, including both climate and land use.

Some proposed topics are :

The Future of Lepidoptera in Europe
Semi-Natural Habitats
Lepidoptera as Indicators of Habitat Quality
Local Conservation Initiatives
Lepidoptera and Climate Change
Conservation and Landscape
Management of Woodlands
Restoration Ecology
Conservation of Tropical Lepidoptera

Although there will be a number of keynote speakers, the majority of the Symposium will be composed of submitted papers and posters. Details of session topics and instructions for submission of abstracts will be detailed in the second announcement. If you wish to receive further information (Butterfly Conservation members will receive this information automatically) please contact :

Dr. Andrew S. Pullin,
