Bibliography of Palaearctic Lepidoptera for 1977 . . . . .	146
Miscellanea. . . . .	172

\* \* \* \* \*

The publication here of the first annual report of the SEL Committee on Current Literature deals with the publications of 1977. However incomplete it may be – some of the recorders who agreed to cooperate never sent their reports and some countries of great lepidopterological past, e.g. Germany (Bundesrepublik Deutschland) and Switzerland, appear to have no interest to take part in the programme – it is a good start. Readers are very likely to find some incomplete data and most unfortunately also various inconsistencies and typographical errors. Please do not blame the Editor of *Nota lepidopterologica* for these errors! The Editor cannot check up every reference with the original unless he receives the originals from the authors! And although the Editor is lucky to understand – in a way – probably more languages than an average mortal he cannot correct or alter the spelling without the examination of the original! Therefore every error that appeared on the card is almost certain to reappear also in *Nota lepidopterologica*.

In the next issue of *Nota lepidopterologica* there will be the report on the First European Congress of Lepidopterology which took place in Paris in spring 1978. After this issue the *Nota lepidopterologica* will return to the “original” form, that is to the new original form. And it is hoped that you will find the new – or rather improved – form to your satisfaction.

This issue is the first produced by our new printers – Leppelt druck+repro – and it is hoped that this change will give us better quality and other long term advantages. However, the change came at an inconvenient time from the technical point of view: the preparation of the ‘Current Literature’ and ‘Congress’ numbers is more demanding.
