

Contribution to the Heteroptera fauna of the Balkan peninsula

Hannes GÜNTHER

Eisenacherstraße 25, D-6507 Ingelheim

Received: September 10th, 1989

Keywords: Heteroptera, Balkans, Greece, fauna

ABSTRACT - A list of Heteroptera from Greece containing 325 species from 95 localities is presented. The specimens were collected by 12 entomologists including the author. Four species (*Amblytylus delicatus*, *Blissus putoni*, *Ceraleptus brevicornis* and *Eurydema rotundicollis*) are new records for the Greek fauna and *Blissus putoni* is for the first time reported in Europe.

IZVLEČEK - PRISPEVEK K FAVNI STENIC BALKANSKEGA POLOTOKA - Avtor navaja favnistične podatke za 325 vrst stenic (Heteroptera) iz 95 lokalitet v Grčiji. Materijal je zbralo 12 entomologov vključno z avtorjem prispevka. Štiri vrste *Amblytylus delicatus*, *Blissus putoni*, *Ceraleptus brevicornis* and *Eurydema rotundicollis* so prvič ugotovljene v Grčiji, vrsta *Blissus putoni* je prvič ugotovljena v Evropi.

During the last decade several entomologists have been on collecting trips in the Balkan peninsula. Some of them have sent me Heteroptera material which they collected in addition to the insects of their own special groups. In this paper, I present the material collected in Greece by Drs. M. ASCHE and H. HOCH (Marburg Germany), E. BETTAG (Dudenhofen), R. BOUWER (Langen), M. GEISTHARDT (Wiesbaden), J. HEMMEN (Wiesbaden), KOSCHWITZ (Eppenbrunn), M. NIEHUIS (Albersweiler), J. SCHEUERN (Lautershofen), P. SPRICK (Hannover), WINKLER, and myself. Of special importance for the enumeration was the voluminous material collected by Drs. H. HOCH and M. ASCHE during their expeditions in 1977 and 1984.

The total number of 325 species of Heteroptera from 95 localities is a serious contribution to the fauna of Greece. Many of these records are taken from places where no previous records were reported, as for example some small islands from the Aegean Sea and some Greek mountains. The collecting sites are presented here in the same manner as given for the family Delphacidae (Homoptera) by ASCHE and REMANE (1982), ASCHE and HOCH (1982) and DROSPOULOS, ASCHE and HOCH (1983).

* I would like to express my sincere gratitude to all them, and to Dr. S. Drosopoulos for commenting on this paper.

According to the catalogue of Balkan Heteroptera published by JOSIFOV (1986), four species (*Amblytylus delicatus*, *Blissus putoni*, *Ceraleptus brevicornis* and *Eurydema rotundicollis* are new records for the Greek fauna. Especially the lygaeid *Blissus putoni* collected on the sandy beach of

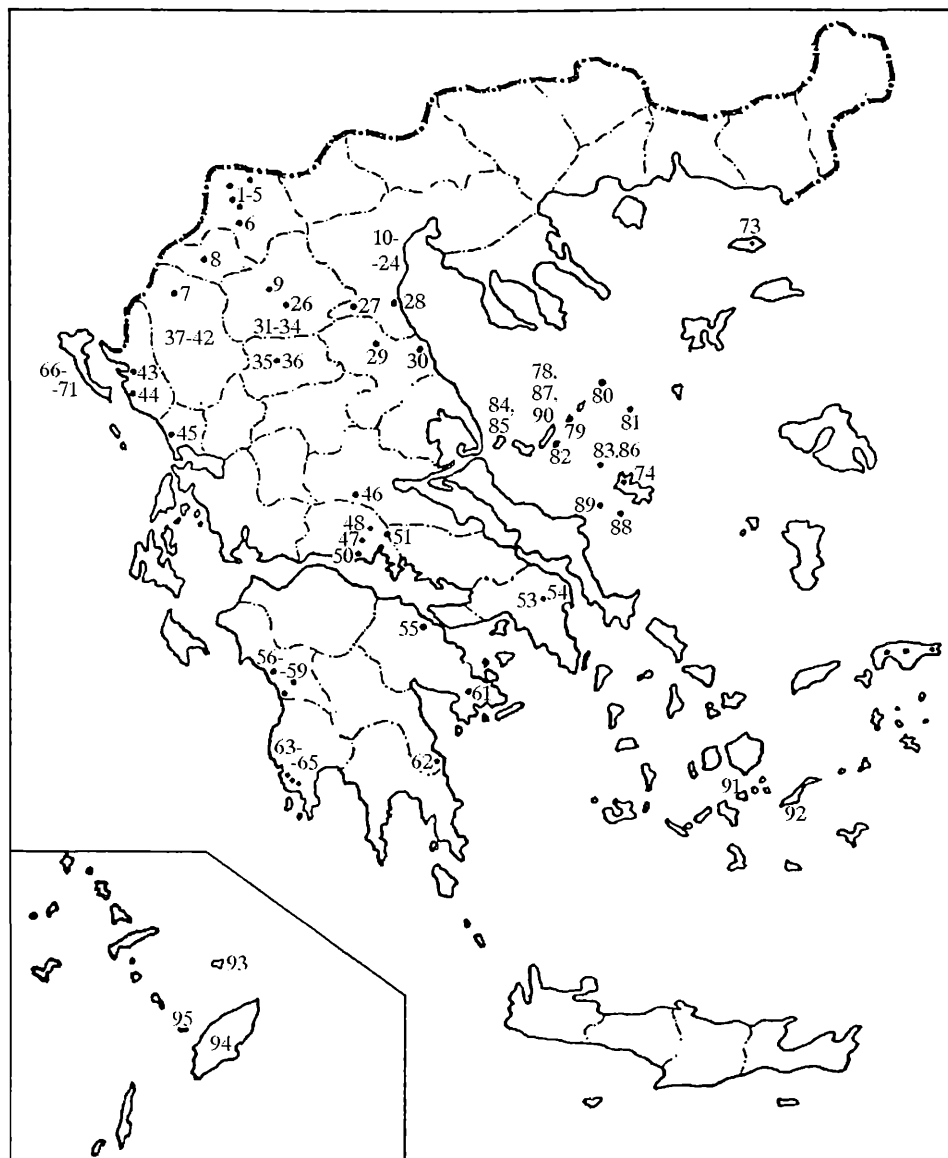

Fig. 1: Nomoi and collecting sites in Greece.

Kephalos-Skyros by LIEBEGOTT is recorded for the first time in the Balkan peninsula and Europe. The material on which I report here is deposited in my personal collection, the specimens of *Blissus putoni* are in the collections of E. HEISS (Innsbruck), M. JOSIFOV (Sofia) and Chr. RIEGER (Nürtingen).

Coreidae

Coreinae

<i>Gonocerus acuteangulatus</i> (Goeze)	9, 72
<i>Gonocerus j. juniperi</i> Herrich-Schäffer	19
<i>Syromastus rhombeus</i> (Linnaeus)	2, 9, 19, 31, 34, 40, 42
<i>Haploprocta sulcicornis</i> (Fabricius)	72, 88
<i>Coreus marginatus</i> (Linnaeus)	9, 11, 40, 42
<i>Centrocoris spiniger</i> (Fabricius)	11, 33, 40, 44, 64
<i>Phyllomorpha laciniata</i> (Villiers)	2, 9

Spathocerinae

<i>Spathocera dahlmagnii</i> (Schilling)	9
<i>Spathocera lobata</i> (Herrich-Schäffer)	9

Pseudophloeinae

<i>Arenocoris waltli</i> (Herrich-Schäffer)	8
<i>Ceraleptus brevicornis</i> Kormilev	47, 51
<i>Ceraleptus gracilicornis</i> (H.-S.)	9
<i>Ceraleptus obtusus</i> (Brulle)	10, 64, 70
<i>Bothrostethus annulipes</i> (Costa)	43
<i>Coriomeris denticulatus</i> (Scopoli)	9, 31, 42, 46, 64
<i>Coriomeris hirticornis</i> (Fabricius)	64, 70, 72, 76
<i>Coriomeris alfinis</i> (Herrich-Schäffer)	8, 32, 45, 72
<i>Strobilotoma typhaecornis</i> (Fabricius)	44

Alydidae

<i>Alydus calcaratus</i> (Linnaeus)	11
<i>Camptopus lateralis</i> (Germar)	18, 31, 34, 38, 42

Rhopalidae

<i>Corizus hyoscyami</i> (Linnaeus)	9, 19, 34, 40, 42
<i>Liorhyssus hyalinus</i> (Fabricius)	1, 4, 32, 35, 43
<i>Rhopalus maculatus</i> (Fieber)	1
<i>Rhopalus parumpunctatus</i> Schilling	1, 9, 22, 33, 34, 40, 42, 44, 46
<i>Rhopalus subrufus</i> (Gmelin)	43, 44, 72
<i>Brachycarenum tigrinus</i> (Schilling)	22, 31
<i>Stictopleurus abutilon</i> (Rossi)	1, 9, 11, 18, 22, 38, 43
<i>Stictopleurus punctatonevrosus</i> (Goeze)	11, 21
<i>Maccevethus caucasicus</i> (Signoret)	61
<i>Maccevethus corsicus</i> (Kolenati)	35, 64
<i>Agraphopus lethierryi</i> Stal	11, 29
<i>Leptoceraea femoralis</i> (Horvath)	15
<i>Chorosoma schillingi</i> (Schilling)	24, 33, 34

Scutelleridae

<i>Odontoscelis byrrhus</i> Seidenstücker	45
<i>Odontoscelis minuta</i> Jakovlev	1, 45
<i>Odontotarsus robustus</i> Jakovlev	20, 35, 36, 64, 65
<i>Odontotarsus plicatulus</i> Horvath	33
<i>Odontotarsus purpureolineatus</i> (Rossi)	2, 9, 33, 43
<i>Eurygaster a. austriaca</i> (Schrank)	30, 54
<i>Eurygaster maura</i> (Linnaeus)	2, 5, 6, 9, 42, 48
<i>Eurygaster dilaticollis</i> Dohrn	2
<i>Eurygaster testudinaria</i> (Geoffroy)	42

Pentatomidae

Podopinae

<i>Ventocoris falcatus f. achivus</i> (Horvath)	65
<i>Ancyrosoma leucogrammes</i> (Gmelin)	11, 16, 22, 23, 40, 45, 64
<i>Tholagus flavolineatus</i> (Fabricius)	9, 19, 40, 64
<i>Graphosoma l. lineatum</i> (Linnaeus)	5, 11, 19, 39, 64
<i>Graphosoma semipunctatum</i> (Fabricius)	48
<i>Derula flavoguttata</i> Mulsant et Rey	1
<i>Podops rectidens</i> Horvath	63

Pentatominae

<i>Apodiphus amygdali</i> (Germar)	21, 65, 77
<i>Sciocoris cursitans</i> (Fabricius)	2, 9, 24
<i>Sciocoris deltocephalus</i> Fieber	85
<i>Sciocoris helferi</i> Fieber	68
<i>Sciocoris macrocephalus</i> Fieber	61
<i>Sciocoris sulcatus</i> Fieber	9, 33
<i>Aelia virgata</i> Klug	33
<i>Aelia rostrata</i> (Boheman)	1, 2, 9, 19, 22, 24, 33, 44, 46, 64
<i>Aelia acuminata</i> (Linnaeus)	9, 11, 16, 22, 23, 24, 29, 34, 35, 42, 46
<i>Neottiglossa bifida</i> (Costa)	45
<i>Neottiglossa leporina</i> (Herrich-Schäffer)	9
<i>Eysarcoris ventralis</i> (Westwood)	15, 36
<i>Stagonomus bipunctatus</i> (Linnaeus)	20, 22, 23
<i>Stagonomus pusillus</i> (Herrich-Schäffer)	9
<i>Stagonomus amoenus</i> (Brulle)	64
<i>Staria lunata</i> Hahn	2, 9, 27, 33, 70
<i>Palomena prasina</i> (Linnaeus)	9, 31
<i>Holcostethus str. strictus</i> (Fabricius)	29
<i>Holcostethus str. vernalis</i> Wolff	42
<i>Holcostethus sphacclatus</i> (Fabricius)	9
<i>Pitedia juniperina</i> (Linnaeus)	32
<i>Carpocoris m. mediterraneus</i> Tamanini	19, 22, 33, 44, 48, 50, 64
<i>Carpocoris pudicus</i> (Poda)	9
<i>Carpocoris purpureipennis</i> (De Geer)	9, 31, 40, 54
<i>Codophila varia</i> (Fabricius)	10, 27, 33, 46, 64
<i>Anthemina lunulata</i> (Goeze)	11, 21, 24, 35
<i>Dolycoris baccarum</i> (Linnaeus)	2, 9, 33, 42, 46, 54, 64
<i>Holcogaster f. fibulata</i> (Germar)	89

<i>Trochiscocoris rotundatus</i> Horvath	2, 9
<i>Bagrada confusa</i> Horvath	33
<i>Eurydema rugulosum</i> (Dohrn)	77
<i>Eurydema ventrale</i> Kolenati	67
<i>Eurydema rotundicolle</i> (Dohrn)	9
<i>Eurydema ornatum</i> (Linnaeus)	24, 30, 70
<i>Eurydema fieberi</i> Fieber	41
<i>Eurydema oleraceum</i> (Linnaeus)	9, 41, 46
<i>Acrosternum heegeri</i> Fieber	35
<i>Nezara viridula</i> (Linnaeus)	21, 37, 44, 72
<i>Piezodorus lituratus</i> (Fabricius)	9
<i>Rhaphigaster nebulosa</i> (Poda)	22

Amyotinae

<i>Picromerus conformis</i> (Herrich-Schäffer)	22
<i>Zicrona caerulea</i> (Linnaeus)	9, 14, 33, 46

Cydnidae

<i>Canthophorus m. melanopterus</i> (H.-S.)	43, 54, 59, 77
<i>Tritomegas sexmaculatus</i> (Rambur)	27, 36
<i>Legnotus picipes</i> (Fallén)	70
<i>Ochetostethus nanus</i> (Herrich-Schäffer)	6, 34
<i>Ochetostethus opacus</i> (Scholtz)	1, 11
<i>Macroscythus brunneus</i> (Fabricius)	92
<i>Geotomus punctulatus</i> (Costa)	70

Plataspidae

<i>Coptosoma scutellatum</i> (Geoffroy)	6, 8, 9, 64
