

**Errata corrige, Vols. 51(1), June 1999 and 52(2),  
December 2000**

**Samuels, G. J., E. Lieckfeldt & H. I. Nirenberg. 1999. *Trichoderma asperellum*, a new species with warted conidia, and redescription of *T. viride*. – *Sydowia* 51: 71–88.**

In this article, a figure legend is incorrect. It should read:

Figs. 7–10. – Colony characters of two strains each of *Trichoderma asperellum* (7, 9) and *T. viride* (8, 10) from PDA (left) and SNA (right) when grown in darkness at 20, 25, 30 and 35 C for 72 h. – Note that there is growth on SNA for *T. viride*, but colonies are barely visible against the background of the medium.

**Barengo, N., Sieber, T. N. & O. Holdenrieder (2000). Diversity of endophytic mycobiota in leaves and twigs of pubescent birch (*Betula pubescens*). – *Sydowia* 52(2): 305–320.**

In this article, some column headings in the Tab. 4 were inadvertently switched. Tab. 4 should read:

Tab. 4. – Endophyte species diversity and evenness indices for the twig samples at each site.

Site	Number of species		Number of very abundant species <sup>1</sup>		Number of abundant species <sup>2</sup>		Evenness <sup>3</sup>	
	4-yr-old	1-yr-old	4-yr-old	1-yr-old	4-yr-old	1-yr-old	4-yr-old	1-yr-old
Pfäffikon ZH	7	7	3.92	3.94	4.83	4.92	0.76	0.75
La Tourbière	8	6	3.13	4.45	4.36	5.01	0.63	0.86
Lindau	11	10	4.40	6.18	6.27	7.38	0.64	0.81
Säles	11	8	4.76	6.02	7.12	6.65	0.61	0.89
Bödmerenwald	5	5	2.32	1.67	2.87	2.39	0.70	0.48

<sup>1</sup> Corresponds to Hill's diversity number N2 (Ludwig & Reynolds, 1988).

<sup>2</sup> Corresponds to Hill's diversity number N1 (Ludwig & Reynolds, 1988).

<sup>3</sup> Corresponds to the modified Hill's ratio (Ludwig & Reynolds, 1988).
