Informal Meeting of Trichoptera Workers
Smith Mountain Lake, Virginia, U.S.A.
August 28 - 30, 1976

Dear Colleague:

Next summer, during August 19 - 27, 1976, entomologists from all over the world will be gathering in Washington, D.C., U.S.A., for the 15th International Congress of Entomology. Several fellow Trichoptera workers have indicated that they plan to attend this Congress.

We cordially invite you and your family to participate in an informal gathering of trichopterologists after the Congress from August 28 through August 30, 1976, at a private, lakeside retreat in the south-central part of the State of Virginia.

Lodging with breakfast at Smith Mountain Lake will be without cost to participants. Transportation arrangements from Washington to the meeting and back to Washington will depend upon the number of people attending; the present expectation is that transportation costs will be minimal, not more than \$ 20. Participants will be notified concerning transportation arrangements after all responses have been received.

It is not intended that this occasion will compare with the excellent, formal Symposia on Trichoptera, but that it will simply permit further development of fellowship and exchange among trichopterologists. In addition to the plans for short, informal presentations and discussions of current research interests, the program will include opportunities to enjoy the pleasant climate and scenery of the southern Appalachian Mountains and to collect specimens from the rich native fauna.

We hope that you will be able to join us next year for this event. If so, please complete the enclosed response and return it to the address shown here by April 1, 1976, so that we may plan appropriately.

Sincerely,

John C. Morse and Oliver S. Flint, Jr., Co-hosts

./.

Informal Meeting of Trichoptera Workers
Smith Mountain Lake, Virginia, U.S.A.
August 28 - 30, 1976

The names of persons in your party: Mr./Mrs./Miss

The number of beds needed:

Would you be willing to make a short, informal presentation concerning your current research interests ? Yes - No

Do you prefer English...., French...., German....,
other.....(specify)

Can you speak English ? Yes - No

Participants will be notified concerning transportation arrangements after all responses have been received.

Please return by April 1, 1976 to:

TRICHOPTERA LARVAE AND PUPAE

As a follow-up to Dr. Marlier's note in Newsletter No. 1, it may interest fellow workers to know that we have a very large collection of Trichoptera larvae and pupae (as well as imagos) in the Collection of Freshwater Organisms of which I am in charge, at the Albany Museum, Grahamstown, Cape, South Africa. These are in spirit (80% ethyl alcohol) and kept properly curated. Nearly all the material is Southern African. All specimens have documentation giving details of collecting place and date, and some of those specimens that have been correlated - larvae with imagos - are specially labelled and in special jars. I hope to continue this work of special labelling as opportunity offers. Of course the great majority of the species represented have not been correlated. I am much interested in compiling keys to larvae and pupae of Southern African genera, and hope to publish these when they have been further tested.
