TRICHOPTERA NEWSLETTER

=====

No. 6

February 1979

=====

Dear Trichopterologist,

This Newsletter continues the literature list and the list of Trichopterologists, and includes some other information. The Proceedings of the 2nd International Symposium on Trichoptera, held in Reading in 1977, were published last year; a prospectus is enclosed.

I wish to draw your attention to the other prospectus enclosed, which announces the new journal AQUATIC INSECTS. The participants at the 1st Trichoptera Symposium in Lunz may remember a discussion about the chances of a scientific journal especially devoted to caddisfly studies. At that time the prospects were not hopeful. Recently, Professor Illies convinced a publisher to risk the issue of at least one number of such a journal, which could become, if enough subscribers are willing to buy it, our most important organ for scientific publications. The continuation of the journal can only be assured if there are enough firm subscriptions; promises are not enough. Please do your best to support the publisher.

Please do not hesitate to send me manuscripts for the next Newsletter, about anything that could be of interest to other Trichopterologists.

With the best wishes for a successful year in 1979,

Yours sincerely,

Hans Malicky
