

INSECT COLLECTIONS OF J.DZIĘDZIELEWICZ IN CRACOW

It is already known that the insect collections of J.Dziędzielewicz, consisting of Neuropteroids in the broader sense, are now in the Gosudarstvennyj Prirodoved-tcheskij Muzej Akademii Nauk SSSR at Lvov, Soviet Union (formerly Dzieduszycki Museum). Many insects were also sent by Dziędzielewicz to the Polish Academy of Sciences in Cracow. This material is now in the Institute of Systematic and Experimental Zoology PAN, Sławkowska 17, Kraków, Poland. It includes the major part of the Trichoptera collection which consists of adults preserved dry.

I have studied this collection during the last two years. It consists of about 1300 specimens representing 166 species, collected mainly in the Eastern and Western Carpathians, in the Ukrainian foothills of the Carpathians, and the southern part of the Roztocze near Lvov. All species described by Dziędzielewicz are represented, and all specimens were identified by himself. From this material I have designated the lectotypes of the following species: *Potamophylax carpathicus* (♂), *Acrophylax vernalis* (♀), *Isogamus czarnohorensis* (♂), *Chaetopteryx polonica* (♂) and *Annitella chomiacensis* (♂). There were also eleven specimens labelled by Dziędzielewicz as "*Annitella kosciuszki* Klap." which offer particular problems. - More details about Dziędzielewicz and the caddisflies collected by him and by others, which are in the above mentioned Institute, are given in two papers which I am publishing in *Acta Zoologica Cracoviensia* and *Bulletin de l'Academie Polonaise des Sciences*.

LIST OF RESEARCH WORKERS ON TRICHOPTERA (contd.from No.5)

Marcos A.GONZALEZ Biological teacher
Universidad de Santiago, Facultad de Biología, Departa-
mento de Zoología, Santiago de Compostela, Spain.
Present interest: Entire order, taxonomy, distribution and
ecology. Investigation area: Península Ibérica.
Information wanted: Literature on Trichoptera.

George L.HARP, Dr., Assoc.Prof.of Zoology
P.O.Box 757, State University of Arkansas, 32467, USA.
Present interests: Hydropsychidae, Taxonomy, geographic
distribution in Arkansas, ecology. Investigation areas:
Arkansas, Missouri.
Information wanted: Taxonomy of larvae occurring in the
middle US.

Other activities and interests: Taxonomy, ecology of
aquatic insects in general; ecology of polluted water;
Odonata, Nepidae (Hemiptera).
