2 July 1982

Dear Colleague,

You are cordially invited to participate in the 4th International Symposium on Trichoptera which will convene at Clemson University from Monday morning, 11 July, through Saturday noon, 16 July, 1983. This will be the first of these international caddisfly symposia to meet in North America.

As in previous symposia, both paper presentations and display demonstrations are encouraged. The official language will be English, but French will be acceptable. Spoken presentations will be limited to 20 minutes, including discussion. Field trips are being planned into the Great Smokey Mountains, the Cherokee Indian Reservation, and mountain and piedmont watersheds nearer Clemson. Informal workshops on general topics are being arranged as well as ample social opportunities for making or renewing personal acquaintances. Publication of the proceedings of the symposium is anticipated. An auxiliary program for guests of participating scientists will include tours of restored homes and churches of the pioneer and pre-Civil War periods in piedmont South Carolina, special visits to see (and possibly purchase) traditional handcrafts and locally produced textile goods for which our region is famous, and other interesting excursions and activities.

Registration forms for the symposium, presentations, demonstrations, accommodations, and transportation are enclosed. These should be completed and returned to me by Monday, 28 February 1983.

Clemson University, with about 11,000 students, is located in the small community of Clemson (permanent population of about 6,000) in the foothills of the beautiful Southern Appalachian Mountains adjacent to Hartwell Reservoir. The exciting Chattooga River, part of the U.S. Wild and Scenic River System and setting for the movie Deliverance, is less than one hour's drive by automobile from the symposium site. In July, we experience temperatures generally between 21 and 35°C (average about 28°C) and occasional late afternoon thunderstorms (average 2.3 cm of rain for the month).

We anticipate another enjoyable and professionally profitable symposium in the successful tradition of the three preceding ones. I hope you will be able to join us.

Sincerely,

*Macrostemum carolina* (Banks)
