

TRICHOPTERA COLLECTIONS IN CHINA

In response to the note in Newsletter no.8 (p.4) I am informed by Mr. You Da-shou of Nanjing Teacher's College that Prof. HWANG CHI-LING died in September 1978. His Trichoptera collections are still in Nanjing Agricultural College, under the care of his former student, Prof. TIAN LI-XIN, in the Department of Plant Protection. I believe that Prof. Tian is currently interested in the Trichoptera of Tibet.

It is also worth recording here that the entomological collections of the Heude Museum, Shanghai, are now deposited in the Peking Institute of Zoology. L.Navás published several descriptions of species from these collections in the "notes d'Entomologie Chinoise". Although I have no information on how many of these type-specimens are still extant, it is probable that several of them may be re-discovered in the Peking Institute of Zoology.
