

Bob WISSEMAN, Graduate student, Research Assistant.  
Dept. of Entomology, Oregon State University, Corvallis OR 97330.  
Present interests: Limnephilidae; Biology of Northwest caddis,  
biogeography, life history strategies, egg biology, predation,  
caddis communities within watersheds. Previously studied: Biology  
of caddis in an Oregon Coast Range watershed (ongoing).  
Investigation area: Pacific Northwest. Willing to identify Trichoptera  
material for other workers: Northwest material only.  
Material wanted: Oregon and Pacific Northwest material (any family).  
Information wanted: Reprints on caddis biology.

DIRECTORY OF TRICHOPTERA WORKERS, GEOGRAPHIC INDEX AND TOPICS  
OF INTEREST.

(compiled by Kenneth MANUEL)

Section I includes the most current known address of those caddis  
workers who have been listed in one or more of the Trichoptera  
Newsletter numbers issued to date. Each address is followed in  
parenthesis by the Newsletter number and page where the "interest  
summary" of an individual appeared. Additional Newsletter number-  
page entries are address changes.

Section II is a geographic index by country of those individuals  
listed in Section I. This index is included to aid workers seeking  
ecological information, taxonomic assistance and/or study specimens  
from specific geographic regions.

Section III contains information of special interest to caddis workers  
that has appeared in past Newsletter numbers. Included are obituary  
notices, tributes, and information concerning the deposition of  
important caddis collections. As in Section I the Newsletter number-  
page entry will direct the reader to the more detailed Newsletter  
article.

Hopefully the listings presented here will be useful to readers  
of the Trichoptera Newsletter and enhance international communication  
between those who study this most fascinating group of insects.  
If incorrect information appears in the listings please notify the  
Editor and corrections will be made in the next Newsletter.
