STETTIN MUSEUM INSECT COLLECTION

Ulmer's work on Sunda Island Trichoptera often refers to the material and types deposited in the Stettin Museum. The fate of this material after the Second World War came to my notice through the work on the family Cupedidae (Coleoptera). The curator of Coleoptera, Dr Adam Slipinski of the Polish Academy of Sciences, Warszawa, Poland, informed me that almost the entire former German Museum material, including the Trichoptera has been transferred to Warszawa and is now in the Institute of Zoology.

It is regretted that there are no specialists in this section and therefore access to the information and loans are rather restricted.

A.NEBOISS
