

## NEW UNPUBLISHED RECORDS FOR SOUTHERN AFRICA

In the course of identifying Trichoptera from many collections over the years, a number of new records for southern Africa were discovered. These have, however, not yet been published, either because of lack of time to make the necessary comparisons, drawings and descriptions, or because more material is needed and the localities involved are often far distant or unaccessible for various reasons. These records are listed below.

Helicopsychidae: Helicopsyche sp. larvae from streams in the Chimanimani National Park, Zimbabwe (5600 - 7500 ft.).

Hydroptilidae: Tricholeiochiton, 3 pupae (2♂, 1♀) and larvae from a stream in the Chindomora Reserve near Harare, Zimbabwe. Also larvae from Botswana and several places in Natal and the Transvaal.

Ithytrichia larvae, a few from Natal, the Transvaal Lowveld and Magoebaskloof on the edge of the Transvaal Highveld.

Stactobia, ♂♂, ♀♀ larvae and pupae, probably representing two new species, from the Chimanimani Mountains, c.5000 ft, in and near waterfalls.

Polycentropodidae: Nyctiophylax ♂, ♀♀ and larvae from the North Cape (Lower Vaal River), and larvae from the Transvaal, Natal and Zimbabwe. They may well be N.orientalis Marlier.

Polypsectropus, 2♂♂, possibly a new species but poor specimens, from Natal, also 1♀ from Zimbabwe.

Xiphocentronidae: Abaria sp., ♂♂, ♀♀, larvae and pupae, probably A.electa Marlier, but shows minor differences, from the East Cape and Natal, and larvae from the Transvaal Lowveld.

## LIST OF RESEARCH WORKERS ON TRICHOPTERA

Mineo KOBAYASHI. Curator in Charge. Department of Zoology, Kanagawa Prefectural Museum. 5-60 Minaminaka-dori, Naka-ku, Yokohama 231, Japan. Present interests: All families, Systematics, distribution. Investigation area: Japan, Formosa, Korea.

Takao NOZAKI (Mr.), Researcher. Environment Research Centre of Kanagawa Prefecture. 1-87-1 Futamatagawa, Asahiku, Yokohama, Japan. Present interests: Taxonomy and ecology of Trichoptera, especially genus Nothopsyche (Limnephilidae). - Material wanted: Larvae and adults of Nothopsyche and Ironoquia. - Information wanted: Taxonomy and ecology of Trichoptera.

Armin WEINZIERL. Alte Regensburger Straße 11, D - 8300 Ergolding (West Germany).

Present interest: Trichoptera in general, taxonomy (adults and larvae), stream zonation, distribution, ecology, especially of Central European species. Investigation area: Southern Bavaria. - Willing to identify for other workers: yes, in small numbers from Central Europe.

Information wanted: Papers on taxonomy, ecology, faunistics of European species. - Other interests: Plecoptera, limnology, saprobiology.
