

Announcement: The Syrphidae of Switzerland

A project has been initiated by the Centre Suisse de Cartographie de la Faune (CSCF) to provide a set of keys to the Syrphidae of Switzerland. These keys, together with Species Accounts from the Syrph the Net (StN) database, will be available for downloading from a website as they become available. The keys will be accessible in English, French and German versions. The steering group for the project is as follows: E. Castella (co-ordinator), C. Claussen, P. Goeldlin, Y. Gonseth (CSCF), A. Lehmann (webmaster), A. Maibach, J.-P. Sarthou, M.C.D. Speight.

The website is still at an early stage of development. Once its format has been finalised its existence will be announced to recipients of the StN files by e-mail. Others who might wish to receive information on progress of the project are invited to contact Emmanuel Castella, at the following address:

Emmanuel.Castella@leba.unige.ch

or by post to: Dr. E. Castella, Laboratoire d'Ecologie et de Biologie Aquatique, Université de Genève, 18 chemin des Clochettes, CH - 1206 Geneve, Switzerland.

The steering group, 5 November 2002.
