

# Zoologischer Anzeiger

herausgegeben

von Prof. J. Victor Carus in Leipzig.

Verlag von Wilhelm Engelmann in Leipzig.

XII. Jahrg.

30. September 1889.

No. 317.

Inhalt: I. Litteratur. p. 489—499. II. Wissensch. Mittheilungen. I. Kramer, Über das Hydrachnidengenus *Anurania* Neum. 2. Wheeler, Über drüsenaartige Gebilde im ersten Abdominalsegment der Hemipterenembryonen. 3. Pergens, Untersuchungen an Seebryozoen. III. Mittheil. aus Museen, Instituten etc. 1. Linnean Society of New South Wales. IV. Personal-Notizen. Vacat.

## I. Litteratur.

### 15. Arthropoda.

a) Insecta.

ζ) Lepidoptera.

## II. Wissenschaftliche Mittheilungen.

### 1. Über das Hydrachnidengenus *Anurania* Neum.

Von Prof. Dr. P. Kramer, Halle a/S.

eingeg. 8. August 1889.

Im Jahre 1879 führte Dr. J. C. Neuman die neue Gattung *Anurania* für zwei in Schweden gefundene und früher in der Gattung *Acercus* C. L. Koch untergebrachte Hydrachniden in das Acariden-system ein. Es entging jedoch anderen Beobachtern nicht, daß die *Anurania*-Arten in mancher Hinsicht den Character von Larven trugen. Th. Barrois und R. Moniez glaubten sogar sich dahin äußern zu können<sup>1</sup>, daß man es wahrscheinlich dabei mit jungen Weibchen von *Arrhenurus* zu thun habe. Diese letztere Vermuthung finde ich bestätigt, indem einer Hydrachiide, welche in allen Puncten einer *Anurania* glich, nach längerem Ruhezustand ein wohl ausgebildetes *Arrhenurus*-Weibchen entstieg. Ich glaube hiernach berechtigt zu sein, die Gattung *Anurania* Neum. für unhaltbar zu erklären.

Halle a/S., 6. August 1889.

<sup>1</sup> Catalogue des Hydrachnides etc. Lille, 1887. p. 34.
