

3) Der poröse Chitinpanzer der *Arrenurus*-Gattung entwickelt sich erst allmählich nach der letzten Häutung.

4) Der Körperanhang der unreifen *Arrenurus*-Männchen (nach der letzten Häutung) ist noch unentwickelt und rudimentär vorhanden.

5) Alle achtfußigen *Nesaea*-Larven besitzen vier Geschlechtsnäpfe, die zu je zwei gruppirt sind.

Bremen, den 5. October 1889.

III. Mittheilungen aus Museen, Instituten etc.

1. Zoological Society of London.

3rd December, 1889. — The Secretary read a report on the additions that had been made to the Society's Menagerie during the month of November 1889. — An extract was read from a letter received from the Rev. G. H. R. Fisk, C.M.Z.S., concerning some specimens of *Bipalium kewense*, which he was keeping in captivity at Capetown. — Mr. Henry Seebohm, F.Z.S., exhibited and made remarks upon some specimens of new or rare species of birds lately received from the Bonin Islands, North Pacific. — Mr. Sclater exhibited and made remarks on an egg of the Crested Screamer (*Chauna chavaria*), from the collection of Mr. J. J. Dalgleish. — Mr. F. E. Beddard, F.Z.S., read the first of a series of contributions to the anatomy of Picarian birds. The present communication treated of some points in the structure of the Hornbills (*Bucerotidae*), particularly of the syrinx, and of the muscular anatomy of these birds. — Mr. Beddard also read a paper upon the anatomy of Burmeister's Cariama (*Chunga Burmeisteri*), and pointed out the differences between this form and *Cariama cristata*. — Mr. G. W. Butler read a paper on the relations of the fat-bodies (subperitoneal and subcutaneous) of the Sauropsida. The author showed that a consideration of the subperitoneal fat-bodies appeared to throw light on the condition of the abdominal membranes in the Monitors. — A communication was read from the Rev. H. S. Gorham, F.Z.S., containing descriptions of new species of the Coleopterous family Erotylidae from various localities. — A communication was read from Mr. L. Taczanowski, C.M.Z.S., containing the description of a new Warbler of the genus *Locustella* from Corea, which he proposed to call *Locustella Pleskei*. — Mr. Oldfield Thomas, F.Z.S., pointed out the characters of a new Mongoose, allied to *Herpestes albicaudatus*, which he proposed to call *H. grandis*. The type specimen (a skeleton) had been obtained by Mr. T. E. Buckley in S.E. Africa. — P. L. Sclater, Secretary.

2. In Sachen der lacustrischen Station am Plöner See.

An Herrn Prof. Dr. J. Victor Carus in Leipzig.

Hochgeehrter Herr!

Ich bitte Sie durch Veröffentlichung dieser Zeilen die Thatsache zur Kenntnis der Leserschaft des »Zoolog. Anzeigers« zu bringen, daß
