**2. Zoological Society of London.**

21st April, 1891. — A communication was read from Lieut.-Col. Sir Oliver B. C. St. John, R.E., F.Z.S., containing notes on a case of a Mongoose (*Herpestes mungo*) breeding during domestication. — Mr. R. E. Holding exhibited and made some remarks on some remarkable horns of Rams of the domestic Sheep of Highland and other breeds. — Messrs. Beddard and Murie exhibited and made remarks on a cancerous nodule taken from the stomach of an African Rhinoceros (*Rhinoceros unicornis*), which had recently died, after living 22 years in the Society's Gardens. — Mr. E. T. Newton, F.Z.S., read a paper on the structure and affinities of *Trogontherium Cuvieri*, basing his remarks principally on a fine skull of this extinct Rodent lately obtained by Mr. A. Savin from the forest-beds of East Runton, near Cromer. — Mr. H. J. Elwes, F.Z.S., read the first part of a memoir on the Butterflies collected by Mr. W. Doherty in the Naga Hills, Assam, the Karen Hills in Lower Burmah, and in the State of Perak. — Mr. J. J. Lister, F.Z.S., gave an account of the birds of the Phoenix Islands, Pacific Ocean, as collected and observed during a visit to this group made in H.M.S. »Egeria« in 1889. — P. L. Sclater, Secretary.
