

Werth hierher, oder nach Hamburg zu senden an Herren Deurer & Kaufmann. Alter Wall 20. Zumal ist mir mit außereuropäischen und südeuropäischen Arten, recent oder fossil, gedient, sofern die Herkunft sicher. Besonders werthvoll wären mir auch Exemplare mit Thier in Alcohol conserviert von Arten aus Africa, Asien und Australien. In Tausch kann ich hiesige Süßwasser-Conchylien offerieren.

Rio Grande do Sul, Brasilien (per Snrs. Pietzeher & Cie.), 5. Aug. 1891.

Dr. H. von Ihering.

July 29th, 1891. — (1) Notes on Aboriginal Stone Weapons and Implements (continued). By R. Etheridge, Junr. — (2) Synonymy of *Helix* (*Hadra*) *gulos*a, Gld. By John Brazier, F.L.S. — (3) The Silurian Trilobites of New South Wales, with References to those of other parts of Australia. Part I. By R. Etheridge, Junr., and John Mitchell. The authors give an epitome of our previous knowledge of the *Proetidae* in Australia; discuss the general question of the genus; and describe three species, two of which were previously known, viz., *Proetus bowningensis*, Mitchell, *P. Rattei*, E. & M., and *P. australis*, E. & M. The characters of the three species are given at length, their relations one to the other, and finally with those of other countries. — (4) Observations on the *Chloraemidae*, with special Reference to some Australian forms. By Professor W. A. Haswell, M.A., D.Sc. This paper has reference chiefly to a remarkable member of the family which occurs on the Queensland coast; but the opportunity has also been taken to give some account of two other undescribed *Chloraemids* obtained by the author in Port Jackson. — Mr. Froggatt exhibited some living beetles (fam. *Curculionidae*), which afford a good example of protective coloration. They were found a few days since at Wellington, N.S.W., on the trunks of Kurrajong trees (*Stereulia*), the bark of which they resemble so closely in tint and general appearance that it was quite by accident he first recognised their true character.
