

Es ist sehr erwünscht, daß nicht nur die Belege zu noch nicht veröffentlichten Untersuchungen vorgeführt werden, sondern auch Praeparate, welche neueren Publicationen der Mitglieder zu Grunde liegen, ferner Instrumente, Apparate und andere Hilfsmittel der Forschung und des Unterrichts.

Der Schriftführer:
Prof. J. W. Spengel (Gießen).

2. Zoological Society of London.

16th February, 1892. — Mr. W. T. Blanford, F.R.S., exhibited two heads and a skin of the Yarkand stag, lent for exhibition by Major C. S. Cumberland, by whom they had been obtained, and proposed the name of *Cervus elaphus yarkandensis* for this form. — Mr. Sclater exhibited and made remarks on some living specimens of what are commonly called Spinning or Japanese Mice. — Mr. Sclater also exhibited and made remarks on some mounted heads of Antelopes from Somali-land, belonging to Capt. Swayne, R.E., amongst which was an example of the recently described Swayne's Hartebeeste (*Bubalis Swaynei*). — Mr. A. Smith-Woodward, F.Z.S., exhibited and made remarks on examples of the supposed jaws and teeth of *Bothriolepis* from the Upper Devonian Formation of Canada. — Mr. F. E. Beddard, F.Z.S., read a paper containing the results of his examination of the Chimpanzee »Sally« and the Orang »George«, lately living in the Society's Menagerie. The author's remarks referred principally to the external characters and the muscular anatomy of these Anthropoid Apes. — A communication from Mr. A. G. Butler, F.Z.S., gave an account of a collection of Lepidoptera from Sandakan, N.E., Borneo. — Mr. G. A. Boulenger, F.Z.S., gave an account of a third collection of Fishes made by Surgeon-Major A. S. G. Jayakar at Muscat, East Coast of Arabia. Amongst these was a specimen of *Histiopterus typus*, a fish described in »Fauna Japonica«, but not since recognized; and an example of a new species of *Box*, proposed to be called *B. lineatus*. — A communication from Dr. W. B. Benham contained a description of three new species of Earthworms from British Colombia and South Africa. These were proposed to be called *Plutellus Ferrieri*, *Microchaeta papillata*, and *M. Belli*. — Mr. F. E. Beddard read a paper on some new species of Earthworms of the genus *Perichaeta*. — A communication was read from Dr. H. Bolau, C.M.Z.S., on the specimens of *Halieatus pelagicus* and *H. Branickii* now living in the Zoological Gardens of Hamburg. Coloured drawings of these nearly allied Sea-Eagles were exhibited. — P. L. Sclater, Secretary.

III. Personal-Notizen.

Necrolog.

Am 3. März starb in Rom, auf der Reise von Czernowitz nach Neapel, Dr. Veit Graber, Professor der Zoologie in Czernowitz, der durch seine Arbeiten über Insecten-Anatomie und -Entwicklungsgeschichte bekannte Forscher. Er war am 2. Juli 1844 im Dorfe Wer bei Innsbruck geboren.
