6th March, 1894. — The Secretary read a report on the additions that
had been made to the Society’s Menagerie during the month of February 1894.
— Mr. W. Bateson, F.Z.S., exhibited and made remarks on a series of
Pilchards, the scales of which presented some remarkable variations. Mr.
Bateson also gave an account of an abnormally coloured Brill. — Dr. J. W.
Gregory, F.Z.S., gave an account of the factors that appear to have
influenced zoological distribution in East Africa, and made some suggestions
as to how the present anomalies of animal life in that part of the continent
might be accounted for. Dr. Gregory also exhibited and made remarks on a
series of lantern-slides illustrative of his recent journey to Mount Kenya. —
A communication was read from Prof. F. Jeffrey Bell, F.Z.S., containing
an account of examples of three species of River-crab of the genus Thelphusa
from different districts of East Africa. — Mr. W. H. Adams read some
notes on the habits of the Flying Squirrels of the Gold Coast belonging to
the genus Anomalurus. — Mr. W. Bateson, F.Z.S., gave an account of
two cases of colour-variation in Flat-fishes, illustrative of the principles of
symmetry. — A communication from Prof. P. R. Uhl er, of Vienna, con-
tained an account of the Hemiptera Heteroptera of Grenada, West Indies,
based on specimens submitted to his examination by the Committee for the
exploration of the West Indies. — A communication was read from Mr. W.
Sch a n s, F.Z.S., containing descriptions of a large number of new species
of Moths from Tropical America. — P. L. Sc lat er, Secretary.
