

municated a paper by Miss Sophie M. Fedarb on some Earthworms from India. Four species were treated of in this paper, of which the following three were described as new:—*Perichaeta cupulifera*, *P. crescentica*, and *Dichogaster parvus*.—Mr. W. E. de Winton, F.Z.S., described a new Rodent of the family Anomaluridae from the Benito River, French Congo, which was referred to a new genus *Aëthurus*, differing from both *Anomalurus* and *Idiurus* in not having any expanded flying-membranes, but resembling the former in the formation of the tail, and being more like the latter in the form of the skull. The species, proposed to be named *Aëthurus glirinus*, was of the same size as *Anomalurus Batesi*, grey in colour, with a black bushy tail and a thickening of the skin of the lower leg, in which are set jet-black club-shaped hairs forming anklets.—A communication was read from Mr. Stanley S. Flower, F.Z.S., in which he pointed out that the Gecko from Penang described by Stoliczka as *Cyrtodactylus affinis* and that described by himself under the name of *Gonatodes penangensis* were identical, and that the proper appellation of the species would be *Gonatodes affinis*.—P. L. Sclater, Secretary.

III. Personal-Notizen.

Unterzeichneter bittet, für ihn bestimmte Briefe und Drucksachen wie folgt zu adressieren: St. Petersburg, Zoologisches Museum der kais. Akademie der Wissenschaften. Dr. N. v. Adelung.

Necrolog.

Am 13. Februar starb in Madrid der Senator Mariano de la Paz Graells, Professor der vergleichenden Anatomie am Museum für Naturgeschichte in Madrid, im 80. Lebensjahr.

Berichtigung.

In No. 559 ist auf p. 327 in der Überschrift zu lesen: »Von Franz Eilhard Schulze«. Ferner auf p. 328 Z. 21 v. o., »dieses Gattungsbegriffes« anstatt »Artbegriffes«.
