## **Dr. John Brittain**

Dr. John E. Brittain has been studying Plecoptera and other aquatic insects for over 40 years. Initially, he took his Ph.D. on the ecology and distribution of Ephemeroptera and Plecoptera at the University of Wales, Bangor, U.K., before moving to Norway on a post-doctoral fellowship, where he worked together with the late Dr. Albert Lillehammer for a number of years. He has stayed in Norway ever since, obtaining a Norwegian dr. philos. degree in 1978. He was awarded a D.Sc. from the University of Wales in 1993 for his significant contribution to science. At present he is Senior Research Scientist at the Freshwater Ecology and Inland Fisheries Laboratory at the Natural History Museum, University of Oslo. In addition he holds the post of Adjunct Professor, in the Department of Ecology and Natural Resources, Norwegian University of Life Sciences and is a Senior Adviser at the Norwegian Water Resources & Energy Directorate, thus combining research, teaching and management.

Dr. Brittain has published extensively on aquatic insects, especially Plecoptera and Ephemeroptera, with a focus on their ecology, notably egg development, life cycles and their use as environmental indicators. The studies have largely been in Europe, especially in arctic and alpine areas, although sorties have been made to Canada and Australia. He is currently chair of the Standing Committee of the International Society of

Plecopterologists. In addition to research on freshwater biodiversity, Dr. Brittain has published widely in radioecology and environmental aspects of hydropower development.

## **TENTH NORTH AMERICAN PLECOPTERA SYMPOSIUM**

### TENTH NORTH AMERICAN PLECOPTERA SYMPOSIUM

Saturday June 8 to Tuesday June 11, 2013  
Lamar, Pennsylvania

Co-sponsored by Lock Haven University of Pennsylvania and  
The Entomological Society of Pennsylvania

The Tenth North American Plecoptera Symposium will be held at the Lock Haven University's Sieg Center field station, located near Lamar, in southeastern Clinton County Pennsylvania, from Saturday afternoon June 8 to noon Tuesday June 11, 2013. Note this is a change in location from the earlier announcement.

This location is a private spot consisting of 44 acres of woodland in a gap in the mountains cut by Fishing Creek, a well-known trophy trout stream. The center has a main lodge with 2 large meeting rooms, a fireplace, kitchen, and separate bunkhouse sleeping rooms for men and women with adjacent bath facilities. Out of state and frequent NAPS attendees will be given preference for the on-site lodging. Motel rooms are available at the Lamar exit of I-80 about 7 miles away for those who do not wish to stay on site.

The Sieg Center is located in the Susquehanna River basin, in a scenic section of the northern edge of the Ridge and Valley Ecoregion. The Allegheny Front dividing the Ridge and Valley from the Appalachian Plateau Ecoregion is a short distance to the north. The site is a private holding within the Pennsylvania Game Commission-owned gamelands #295 and close to Bald Eagle, Sproul and Tiadaghton state forests. Maps and information can be found on the following websites: <http://www.lhup.edu/sieg/>, [www.dcnr.state.pa.us](http://www.dcnr.state.pa.us), and [www.pgc.state.pa.us](http://www.pgc.state.pa.us).
