

Acknowledgments

As managing editor, I thank Dr. Manuel Tierno de Figueroa (Granada, Spain) for supplying an early draft of this year's bibliography and for additions provided by Peter Zwick (Schlitz, Germany), Boris C. Kondratieff (Fort Collins, Colorado), Dávid Muranyi (Budapest, Hungary), Suzanna Cherchesova (North Ossetia, Vladikavkaz, Russian Federation), and Valentina Teslenko (Vladivostok, Russia), Weihai Li (Xinxiang, Henan Province, China). Additionally, Species File Group staff member, Heidi Hopkins of Ithaca, New York, USA, has diligently added references to Plecoptera Species File (<http://plecoptera.speciesfile.org>). Debra Paul (Champaign, Illinois) helped create a Bibtext version of the bibliography available from the Managing Editor.

The members of the Editorial Board quickly reviewed an early draft of the document. I also wish to thank contributors of obituaries by Tomáš Derka (Bratislava, Slovakia) and Lynn Lozier (Fairfax, California). Society members contributed laboratory summaries which made this issue of *Perla* fascinating reading. Christian Roesti (Bern, Switzerland) provided the cover photograph of the recently described *Isoperla felderorum* Roesti, 2021.
